# Contents

vii **Course Overview**

**1 Unit 1: Introduction to Screen Programming**

1	Lesson: Explaining the User Dialog Programming Model
1	Lesson: Introducing Screen Programming
1	Lesson: Creating Screens and Screen Elements
1	Lesson: Modifying Screens at Runtime
1	Lesson: Designing Screen Sequence
1	Lesson: Calling a Dialog Box Dynamically

**3 Unit 2: The Program Interface**

3	Lesson: Explaining User Interfaces
3	Lesson: Setting a GUI Title and a GUI Status

**5 Unit 3: Simple Screen Elements**

5	Lesson: Creating Screen Elements for Output
5	Lesson: Creating Input/Output Fields
5	Lesson: Defining Checkboxes and Radio Button Groups
5	Lesson: Creating Pushbuttons

**7 Unit 4: Screen Error Handling**

7	Lesson: Handling Errors Using Dialog Messages and Field Input Checks
7	Lesson: Handling Errors Using Navigation and Input Help

**9 Unit 5: Subscreens**

9	Lesson: Creating Subscreens
---	-----------------------------

**11 Unit 6: Tabstrip Controls**

11	Lesson: Creating Tabstrip Controls
11	Lesson: Programming Tabstrip Controls

**13 Unit 7: Table Controls**

13	Lesson: Creating Table Controls
13	Lesson: Modifying Table Controls at Runtime
13	Lesson: Changing Table Controls at Runtime

**15 Unit 8: Context Menus**

15	Lesson: Implementing Context Menus
----	------------------------------------

# Course Overview

## TARGET AUDIENCE

This course is intended for the following audiences:

- Developer
- Development Consultant

## Lesson 1: Explaining the User Dialog Programming Model

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain the single-screen transaction model
- Describe ABAP program types

## Lesson 2: Introducing Screen Programming

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe the concepts related to screen programming

## Lesson 3: Creating Screens and Screen Elements

### Lesson Objectives

After completing this lesson, you will be able to:

- Create screens and screen elements

## Lesson 4: Modifying Screens at Runtime

### Lesson Objectives

After completing this lesson, you will be able to:

- Modify screens at runtime

## Lesson 5: Designing Screen Sequence

### Lesson Objectives

After completing this lesson, you will be able to:

- Design screen sequences

## Lesson 6: Calling a Dialog Box Dynamically

## Lesson Objectives

After completing this lesson, you will be able to:

- Call dialog boxes dynamically

## Lesson 1: Explaining User Interfaces

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain user interface
- Explain user interface functions

## Lesson 2: Setting a GUI Title and a GUI Status

### Lesson Objectives

After completing this lesson, you will be able to:

- Create a GUI title
- Create a GUI status

## Lesson 1: Creating Screen Elements for Output

### Lesson Objectives

After completing this lesson, you will be able to:

- Define text fields
- Define status icons
- Define group boxes

## Lesson 2: Creating Input/Output Fields

### Lesson Objectives

After completing this lesson, you will be able to:

- Define input/output fields
- Define dropdown boxes for input/output

## Lesson 3: Defining Checkboxes and Radio Button Groups

### Lesson Objectives

After completing this lesson, you will be able to:

- Define checkboxes
- Define buttons

## Lesson 4: Creating Pushbuttons

### Lesson Objectives

After completing this lesson, you will be able to:

- Define pushbuttons

## **Lesson 1: Handling Errors Using Dialog Messages and Field Input Checks**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Send dialog messages
- Check field values
- Implement field input checks

## **Lesson 2: Handling Errors Using Navigation and Input Help**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Navigate between screens
- Check inputs by using input help

## Lesson 1: Creating Subscreens

### Lesson Objectives

After completing this lesson, you will be able to:

- Define subscreen areas and subscreens
- Process subscreens
- Embed subscreens

## Lesson 1: Creating Tabstrip Controls

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe tabstrip controls
- Define tabstrip controls

## Lesson 2: Programming Tabstrip Controls

### Lesson Objectives

After completing this lesson, you will be able to:

- Use local scrolling in Tabstrip Controls
- Use PAI scrolling in Tabstrip Controls
- Create tabstrip controls using the wizard

## Lesson 1: Creating Table Controls

### Lesson Objectives

After completing this lesson, you will be able to:

- Define table controls
- Create table controls
- Set table control attributes

## Lesson 2: Modifying Table Controls at Runtime

### Lesson Objectives

After completing this lesson, you will be able to:

- Process table controls
- Change table control content at runtime
- Create table controls

## Lesson 3: Changing Table Controls at Runtime

### Lesson Objectives

After completing this lesson, you will be able to:

- Set table control attributes
- Sort table controls at runtime
- Use table control paging at runtime

## Lesson 1: Implementing Context Menus

### Lesson Objectives

After completing this lesson, you will be able to:

- Implement context menus

## Lesson 1: Implementing Splitter Control

### Lesson Objectives

After completing this lesson, you will be able to:

- Implement splitter control
