Contents

vii **Course Overview**

1 Unit 1: Creating geo maps

- 1 Lesson: Geo maps basics
- 1 Lesson: Understanding and creating GeoJSON files
- 1 Lesson: Geo maps scripting

3 Unit 2: Composites

- 3 Lesson: Using composites
- 3 Lesson: Creating composites

5 Unit 3: Using the result set in script

- 5 Lesson: Looping over the result set in script

7 Unit 4: Dynamic creation of components

- 7 Lesson: Creating components within scripting
- 7 Lesson: Creating property binding within scripting

9 Unit 5: Advanced application design techniques

- 9 Lesson: Creating generic applications
- 9 Lesson: Using the new bookmarking concept
- 9 Lesson: Understanding and using the commentary framework
- 9 Lesson: Understanding and using scheduling of documents
- 9 Lesson: Understanding and using the authoring concept

11 Unit 6: Performance Optimization

- 11 Lesson: Basic performance topics
- 11 Lesson: Performance recommendations for application designers
- 11 Lesson: Additional various performance details
- 11 Lesson: Performance recommendations for administrators

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Development Consultant
- Technology Consultant
- Business Analyst

Lesson 1: Geo maps basics

Lesson Objectives

After completing this lesson, you will be able to:

- understand basic concepts of geo maps

Lesson 2: Understanding and creating GeoJSON files

Lesson Objectives

After completing this lesson, you will be able to:

- understand how to create a GeoJSON files

Lesson 3: Geo maps scripting

Lesson Objectives

After completing this lesson, you will be able to:

- build scripted interaction with maps

Lesson 1: Using composites

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the use case for composite components and use existing composites

Lesson 2: Creating composites

Lesson Objectives

After completing this lesson, you will be able to:

- Define and use composites and understand their features and functions

Lesson 1: Looping over the result set in script

Lesson Objectives

After completing this lesson, you will be able to:

- Iterate the result set in scripting

Lesson 1: Creating components within scripting

Lesson Objectives

After completing this lesson, you will be able to:

- Create components and data sources within script

Lesson 2: Creating property binding within scripting

Lesson Objectives

After completing this lesson, you will be able to:

- Define property bindings in script

Lesson 1: Creating generic applications

Lesson Objectives

After completing this lesson, you will be able to:

- Create generic applications

Lesson 2: Using the new bookmarking concept

Lesson Objectives

After completing this lesson, you will be able to:

- Use the new bookmarking concept to enable your end users to store different navigation states

Lesson 3: Understanding and using the commentary framework

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the commentary scenarios, features and functions of commentary

Lesson 4: Understanding and using scheduling of documents

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the scheduling options for .lumx files

Lesson 5: Understanding and using the authoring concept

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the Authoring feature

Lesson 1: Basic performance topics

Lesson Objectives

After completing this lesson, you will be able to:

- understand basic performance implications

Lesson 2: Performance recommendations for application designers

Lesson Objectives

After completing this lesson, you will be able to:

- understand performance recommendations for application designers

Lesson 3: Additional various performance details

Lesson Objectives

After completing this lesson, you will be able to:

- Processing Groups
- understand the benefits and limitations of roundtrip optimization

Lesson 4: Performance recommendations for administrators

Lesson Objectives

After completing this lesson, you will be able to:

- understand performance recommendations for administrators
