Contents

vii **Course Overview**

1 Unit 1: Aligning SAP Customer Data Cloud Regulations and the CX Portfolio

- 1 Lesson: Connecting SAP Customer Data Cloud with Regulation Needs
- 1 Lesson: Connecting SAP Customer Data Cloud with the SAP Customer Experience Solutions

3 Unit 2: Configuring and Administering a Console site

- 3 Lesson: Configuring a Console Site

5 Unit 3: Configuring Schema

- 5 Lesson: Determining Which Store to Use
- 5 Lesson: Recognizing the User Account Structure
- 5 Lesson: Viewing and Editing Schema Fields
- 5 Lesson: Designing Group Models
- 5 Lesson: Configuring and Designing Data Store Schema

7 Unit 4: Managing Customer Identity

- 7 Lesson: Discovering Customer Identity
- 7 Lesson: Creating a Lite Registration
- 7 Lesson: Creating Full Registration Accounts
- 7 Lesson: Managing Screenset and Workflows
- 7 Lesson: Discovering Authentication Security Options
- 8 Lesson: Developing and Debugging Applications
- 8 Lesson: Reacting to identity events in real time

9 Unit 5: Using REST APIs to Deliver Identity Flows

- 9 Lesson: Understanding the REST API

11 Unit 6: Exploring Authentication Methods

- 11 Lesson: Utilizing Social Login to Register and Login
- 11 Lesson: Implementing the Phone Number Login Authentication Option
- 11 Lesson: Implementing Email One-Time-Passcode and Magic Link Login
- 11 Lesson: Applying RBA rules in the Console

13	Unit 7:	Exploring Advanced Authentication Methods
13		Lesson: Certificate Provisioning Configuration
13		Lesson: Exploring the Push Authentication Option
13		Lesson: Exploring FIDO Authentication
13		Lesson: Setting up Site Groups and Single Sign On SSO
13		Lesson: Exploring Global Access
15	Unit 8:	Managing Customer Consent
15		Lesson: Discover Customer Consent Regulations
15		Lesson: Managing the SAP Customer Consent Regulations
15		Lesson: Discover SAP Customer Consent Version Control
15		Lesson: Managing Consent Interactions Using the Consent Vault
15		Lesson: Configuring the Self-Service Preference Center
16		Lesson: Configuring Communication Topics
17	Unit 9:	Using Extensibility Solutions
17		Lesson: Configuring Webhooks
17		Lesson: Configuring Extensions
17		Lesson: Defining JavaScript Parameters
19	Unit 10:	Managing Identity Exchange
19		Lesson: Discovering the SAP Customer Profile
19		Lesson: Utilizing Gconnectors
19		Lesson: Configuring Dataflows and Components
19		Lesson: Ensuring Compliance Using Dataflows
21	Unit 11:	Managing Federation
21		Lesson: Defining Federation
21		Lesson: Configuring SAML
21		Lesson: Configuring OpenID Connect (OIDC)
21		Lesson: Utilizing JSON Web token (JWT)
23	Unit 12:	Integrating Mobile Apps
23		Lesson: Exploring Mobile SDK Development Options
23		Lesson: Implementing Android SDK
23		Lesson: Implementing iOS SDK
25	Unit 13:	Implementing SAP Customer Data Cloud B2B
25		Lesson: Exploring B2B Capabilities
25		Lesson: Configuring B2B Organization Setup
25		Lesson: Configuring Authorization Setup
25		Lesson: Implementing Organization Management

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Development Consultant
- Developer

Lesson 1: Connecting SAP Customer Data Cloud with Regulation Needs

Lesson Objectives

After completing this lesson, you will be able to:

- Determine how SAP Customer Data Cloud aligns with regulation needs to provide a trusted customer relationship.

Lesson 2: Connecting SAP Customer Data Cloud with the SAP Customer Experience Solutions

Lesson Objectives

After completing this lesson, you will be able to:

- Determine how SAP Customer Data Cloud aligns to the greater CX Portfolio in order to improve the customer experience.

Lesson 1: Configuring a Console Site

Lesson Objectives

After completing this lesson, you will be able to:

- Recognize the key features of the SAP Customer Data Console to manage the site configuration and access tools that display, query, and analyze your user database.

Lesson 1: Determining Which Store to Use

Lesson Objectives

After completing this lesson, you will be able to:

- Determine the appropriate repository to store customer data to enable customer account queries.

Lesson 2: Recognizing the User Account Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Recognize the user account structure to centralize the storage of all user data.

Lesson 3: Viewing and Editing Schema Fields

Lesson Objectives

After completing this lesson, you will be able to:

- Use Schema Editor to easily and interactively edit your site's schema.

Lesson 4: Designing Group Models

Lesson Objectives

After completing this lesson, you will be able to:

- Design Group Models that can hold multiple customer accounts under a single category.

Lesson 5: Configuring and Designing Data Store Schema

Lesson Objectives

After completing this lesson, you will be able to:

- Configure and design data store schema to easily search for any stored fields in the data.

Lesson 1: Discovering Customer Identity

Lesson Objectives

After completing this lesson, you will be able to:

- Recognize what Customer Identity is to enable you to better connect with your customers from various channels.

Lesson 2: Creating a Lite Registration

Lesson Objectives

After completing this lesson, you will be able to:

- Discover different types of accounts, Lite Registration use cases and functions to implement Lite Registration flow and access Lite Registration data through Identity Access.

Lesson 3: Creating Full Registration Accounts

Lesson Objectives

After completing this lesson, you will be able to:

- Discover Full Registration features and functions to create full accounts by following various implementation approaches.

Lesson 4: Managing Screenset and Workflows

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the features and functions of the UI Builder to manage the workflows in your site.

Lesson 5: Discovering Authentication Security Options

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the types of authentication that will allow users to use your sites.

Lesson 6: Developing and Debugging Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Develop and debug applications with the Javascript Web SDK methods and events.

Lesson 7: Reacting to identity events in real time

Lesson Objectives

After completing this lesson, you will be able to:

- Design identity flows that will react to identity events in near-real time.

Lesson 1: Understanding the REST API

Lesson Objectives

After completing this lesson, you will be able to:

- Discover how to utilize REST APIs to consume Customer Data Cloud services and implement various flows.

Lesson 1: Utilizing Social Login to Register and Login

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the Social Login features and manage the data permissions to implement social flows.

Lesson 2: Implementing the Phone Number Login Authentication Option

Lesson Objectives

After completing this lesson, you will be able to:

- Manage the Phone Number Login authentication option to offer customers greater flexibility when logging into an account.

Lesson 3: Implementing Email One-Time-Passcode and Magic Link Login

Lesson Objectives

After completing this lesson, you will be able to:

- Configure Email One-Time-Passcode and Magic Link Login

Lesson 4: Applying RBA rules in the Console

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the various criteria and actions that can be applied to login attempts using RBA rules to add an extra layer of account security to your site.

Lesson 1: Certificate Provisioning Configuration

Lesson Objectives

After completing this lesson, you will be able to:

- Generate a Certificate Provisioning to give customers a better user experience on social platforms.

Lesson 2: Exploring the Push Authentication Option

Lesson Objectives

After completing this lesson, you will be able to:

- Manage the Push Authentication option to allow customers to authenticate on their mobile phones.

Lesson 3: Exploring FIDO Authentication

Lesson Objectives

After completing this lesson, you will be able to:

- Discover how to implement FIDO Authentication to allow storing credentials in a device and use that same device for authentication.

Lesson 4: Setting up Site Groups and Single Sign On SSO

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the benefits of single Sign On for Site Groups to give customers a better user experience.

Lesson 5: Exploring Global Access

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the key features of Global Access and how to configure to provide customers a consistent user experience regardless of physical location.

Lesson 1: Discover Customer Consent Regulations

Lesson Objectives

After completing this lesson, you will be able to:

- Discover customer consent regulations for managing user privacy and preferences.

Lesson 2: Managing the SAP Customer Consent Regulations

Lesson Objectives

After completing this lesson, you will be able to:

- Discover the SAP Customer Consent offering for managing user privacy and preferences to support compliance with international privacy regulations.

Lesson 3: Discover SAP Customer Consent Version Control

Lesson Objectives

After completing this lesson, you will be able to:

- Discover SAP Customer Consent Version Control to ensure that users to your site have a valid consent.

Lesson 4: Managing Consent Interactions Using the Consent Vault

Lesson Objectives

After completing this lesson, you will be able to:

- Discover how to use the consent vault to view the status of users' consent and to search the history of all consent objects on your site.

Lesson 5: Configuring the Self-Service Preference Center

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the Self-Service Preference Center to clearly display to the user the data stored in their account.

Lesson 6: Configuring Communication Topics

Lesson Objectives

After completing this lesson, you will be able to:

- Define and manage communication channels and topics to customize communication preferences

Lesson 1: Configuring Webhooks

Lesson Objectives

After completing this lesson, you will be able to:

- Configure Webhooks to enable notifications to specific events.

Lesson 2: Configuring Extensions

Lesson Objectives

After completing this lesson, you will be able to:

- Configure extensions to perform validation using synchronous server-side custom code.

Lesson 3: Defining JavaScript Parameters

Lesson Objectives

After completing this lesson, you will be able to:

- Define JavaScript Parameters to give you greater flexibility when customizing the user interaction with your SAP Customer Data Cloud screens.

Lesson 1: Discovering the SAP Customer Profile

Lesson Objectives

After completing this lesson, you will be able to:

- Summarize how the SAP Customer Profile is used to leverage and enhance a customer's existing business relationships with your brands.

Lesson 2: Utilizing Gconnectors

Lesson Objectives

After completing this lesson, you will be able to:

- Discover how GConnectors are used to facilitate integrating SAP Customer Data Cloud with external systems.

Lesson 3: Configuring Dataflows and Components

Lesson Objectives

After completing this lesson, you will be able to:

- Configure dataflow to enable bulk data transfer between platforms.

Lesson 4: Ensuring Compliance Using Dataflows

Lesson Objectives

After completing this lesson, you will be able to:

- Set up Dataflows to sync consent-based user data to third party applications using the exercise steps.

Lesson 1: Defining Federation

Lesson Objectives

After completing this lesson, you will be able to:

- Determine the appropriate Identity Management standards and authentication systems to store information securely.

Lesson 2: Configuring SAML

Lesson Objectives

After completing this lesson, you will be able to:

- Configure SAML to enable exchange authentication and authorization data between entities.

Lesson 3: Configuring OpenID Connect (OIDC)

Lesson Objectives

After completing this lesson, you will be able to:

- Configure OpenID Connect (OIDC) to verify the identity of an end-user based on the authentication performed by an authorization server.

Lesson 4: Utilizing JSON Web token (JWT)

Lesson Objectives

After completing this lesson, you will be able to:

- Use JWT to securely transmit information between parties as a JSON object.

Lesson 1: Exploring Mobile SDK Development Options

Lesson Objectives

After completing this lesson, you will be able to:

- Use the Mobile SDK features to implement CIAM capabilities in mobile apps.

Lesson 2: Implementing Android SDK

Lesson Objectives

After completing this lesson, you will be able to:

- Implement Android SDK CIAM APIs on an Android app.

Lesson 3: Implementing iOS SDK

Lesson Objectives

After completing this lesson, you will be able to:

- Implement iOS SDK CIAM APIs on an iOS app.

Lesson 1: Exploring B2B Capabilities

Lesson Objectives

After completing this lesson, you will be able to:

- Explore CDC capabilities to get an understanding of the scope of CIAM for B2B features.

Lesson 2: Configuring B2B Organization Setup

Lesson Objectives

After completing this lesson, you will be able to:

- Use Organization workspace settings to manage your B2B organization's workspace.

Lesson 3: Configuring Authorization Setup

Lesson Objectives

After completing this lesson, you will be able to:

- Configure your policy-based authorizations to setup access constraints for B2B customers.

Lesson 4: Implementing Organization Management

Lesson Objectives

After completing this lesson, you will be able to:

- Implement policy-based authorizations for a B2B customer-facing application.
