Contents

vii **Course Overview**

1 Unit 1: SAP Data Intelligence Cloud - Strategy and Overview

1 Lesson: Using Data Process Orchestration for Intelligent Enterprise

3 Unit 2: Connection Management in SAP Data Intelligence Cloud

3 Lesson: Integrating Data Sources and Data Targets in SAP Data Intelligence

3 Lesson: Integrating SAP Systems

3 Lesson: Integrating non-SAP Systems, Applications, and Storages

5 Unit 3: Metadata Management and Information Cataloging

5 Lesson: Data Discovery and Information Cataloging with the SAP Data Intelligence Metadata Explorer

5 Lesson: Leveraging Business Glossaries and Managing Data Object Relationships

5 Lesson: Using Data Quality Rules and Dashboards

5 Lesson: Enabling Business Users to Augment Data

7 Unit 4: Building Data Driven Applications in Data Intelligence Cloud with Data Pipelines and Workflows

7 Lesson: Building data-driven applications with the SAP Data Intelligence Modeler

7 Lesson: Getting an introduction to data pipelines and workflows

7 Lesson: Modeling and executing data pipelines and workflows

7 Lesson: Monitoring and status tracking of data pipelines

7 Lesson: Debugging your data pipelines

7 Lesson: ABAP System integration with SAP Data Intelligence

9 Unit 5: Intelligent Processing - Machine Learning Integration in SAP Data Intelligence Cloud

9 Lesson: Operationalizing machine learning / analytical models with the SAP Data Intelligence ML Scenario Manager

9 Lesson: Realizing intelligent processing with the tooling components of the ML Scenario Manager

11 Unit 6: Appendix: Positioning

11 Lesson: Backup: Positioning

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

Lesson 1: Using Data Process Orchestration for Intelligent Enterprise

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the concepts and strategy behind SAP Data Intelligence

Lesson 1: Integrating Data Sources and Data Targets in SAP Data Intelligence

Lesson Objectives

After completing this lesson, you will be able to:

- Navigate through the Connection Management application and maintain Connections in SAP Data Intelligence

Lesson 2: Integrating SAP Systems

Lesson Objectives

After completing this lesson, you will be able to:

- Simply create valid connections to SAP HANA database and ABAP systems

Lesson 3: Integrating non-SAP Systems, Applications, and Storages

Lesson Objectives

After completing this lesson, you will be able to:

- Simply create valid connections to non-SAP systems and storages

Lesson 1: Data Discovery and Information Cataloging with the SAP Data Intelligence Metadata Explorer

Lesson Objectives

After completing this lesson, you will be able to:

- Be able to browse, explore, evaluate, and organize your data assets

Lesson 2: Leveraging Business Glossaries and Managing Data Object Relationships

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how and where Glossaries are organized and used in the business

Lesson 3: Using Data Quality Rules and Dashboards

Lesson Objectives

After completing this lesson, you will be able to:

- Get to know how rules and metrics can be applied to data sets and used in visualizations and individual dashboards

Lesson 4: Enabling Business Users to Augment Data

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how business users are enabled to fulfill data preparation tasks with limited or no technical skills

Lesson 1: Building data-driven applications with the SAP Data Intelligence Modeler

Lesson Objectives

After completing this lesson, you will be able to:

- Building data-driven applications with the SAP Data Intelligence Modeler

Lesson 2: Getting an introduction to data pipelines and workflows

Lesson Objectives

After completing this lesson, you will be able to:

- Get an introduction to data pipelines and workflows

Lesson 3: Modeling and executing data pipelines and workflows

Lesson Objectives

After completing this lesson, you will be able to:

- Model and execute data pipelines and workflows

Lesson 4: Monitoring and status tracking of data pipelines

Lesson Objectives

After completing this lesson, you will be able to:

- Learn about the monitoring and status tracking of data pipelines

Lesson 5: Debugging your data pipelines

Lesson Objectives

After completing this lesson, you will be able to:

- Learn about debugging your pipeline

Lesson 6: ABAP System integration with SAP Data Intelligence

Lesson Objectives

After completing this lesson, you will be able to:

- Learn about Data Pipelines and Workflows for ABAP System Integration

Lesson 1: Operationalizing machine learning / analytical models with the SAP Data Intelligence ML Scenario Manager

Lesson Objectives

After completing this lesson, you will be able to:

- Use the ML Data Manager and the ML Scenario Manager to develop and deploy analytical models in SAP Data Intelligence and handle inference requests

Lesson 2: Realizing intelligent processing with the tooling components of the ML Scenario Manager

Lesson Objectives

After completing this lesson, you will be able to:

- Realize intelligent processing with the tooling components of the ML Scenario Manager

Lesson 1: Backup: Positioning

Lesson Objectives

After completing this lesson, you will be able to:

- Positioning
