vii Course Overview

1 Unit 1: Explaining Defense and Security Logistics - Introduction and Overview

1	Lesson: Describing the Motivation for Defense and Security Logistics
1	Lesson: Explaining Stocks Versus Provisions
1	Lesson: Explaining Organizational Structure Integration
1	Lesson: Explaining the Material Numbering Solution

3 Unit 2: Describing Stocks Processes

3	Lesson: Describing Stocks Master Data
3	Lesson: Assigning Stocks Authorizations
3	Lesson: Explaining the Authorized-Actual (AAC) Report
3	Lesson: Explaining Stocks Requirements and Fulfillment
4	Lesson: Explaining the Condition Code/Return Delivery
4	Lesson: Describing Loans
4	Lesson: Explaining Equipment Packages (EPA)

5 Unit 3: Exploring Provisions

5	Lesson: Explaining Logistical Integration in Org. structure
5	Lesson: Describing Master Data for Provisions
5	Lesson: Explaining Prioritization of Requirements
5	Lesson: Explaining Provisions Packages and Initial Supply Run
5	Lesson: Explaining Manual Requests, Advice, and Status Code
5	Lesson: Explaining MRP Live Requests
6	Lesson: Explaining Automated Supply of High Priority Requirements
6	Lesson: Explaining Return Delivery

7 Unit 4: Explaining Defense and Security: Personal and Functional Equipment

7	Lesson: Describing Personal and Functional Equipment - Overview and Concepts
7	Lesson: Describing Planning of Personal and Functional Equipment
7	Lesson: Describing the Issuing of Personal and Functional Equipment
7	Lesson: Describing Reporting and Service Activities
7	Lesson: Describing the Returning of Personal and Functional Equipment
8	Lesson: Describing Customizing and Master Data

9 Unit 5: Describing and Using Plant Maintenance Integration

9	Lesson: Describing Technical Objects in Defense Maintenance
9	Lesson: Explaining Work Center Integration
9	Lesson: Describing Model Maintenance Dependencies in a Defense Organization
9	Lesson: Outlining the Standard Corrective Maintenance Process
9	Lesson: Describing the Forwarding Process of Maintenance Notifications
10	Lesson: Describing the Usage of Extended View for Maintenance Notification
10	Lesson: Explaining Maintenance Book
10	Lesson: Utilizing Status Management
10	Lesson: Monitoring a Relocation of Technical Objects
10	Lesson: Identifying and Modeling Platforms to Describe Business Capabilities
11	Lesson: Using the D&S Application Variants for Standard Maintenance Applications

13 Unit 6: Managing and Creating the Support of Flight Operations

13	Lesson: Outlining the Support of Flight Operations Prerequisites
13	Lesson: Describing Support of Flight Operations Scenarios
13	Lesson: Managing Status in Flight Operation
13	Lesson: Creating and Monitoring Flights
13	Lesson: Explaining Aircraft Assignment
13	Lesson: Describing after Flight Debriefing and Malfunction Documentation
14	Lesson: Describing Customizing

15 Unit 7: Explaining DFPS: Provisions (Appendix)

15	Lesson: Explaining Logistical Integration into Organizational Structure
15	Lesson: Describing Provisions Master Data
15	Lesson: Describing Prioritization of Requirements
15	Lesson: Describing Initial Supply Run
15	Lesson: Describing Manual Requests
16	Lesson: Describing Live Requests
16	Lesson: Describing Automated Supply of High-Priority Requirements
16	Lesson: Describing Return Deliveries

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Support Consultant
- Business Process Architect
- Business Process Owner/Team Lead/Power User
- Solution Architect

Lesson 1: Describing the Motivation for Defense and Security Logistics

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the motivation for Defense and Security logistics

Lesson 2: Explaining Stocks Versus Provisions

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the difference between Stocks and Provisions

Lesson 3: Explaining Organizational Structure Integration

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the organizational structure integration

Lesson 4: Explaining the Material Numbering Solution

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Defense and Security Material Numbering Solution

Lesson 1: Describing Stocks Master Data

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Flexible Material Planning Object (FMPO) structure
- Describe the mapping between DFPS and D&S master data
- Create an FMPO
- Create an FMPO hierarchy

Lesson 2: Assigning Stocks Authorizations

Lesson Objectives

After completing this lesson, you will be able to:

- Assign FMPO authorizations to Force Elements and Positions
- Explain the FMPO assignment attributes
- Assign Product Authorizations to Force Elements and Positions

Lesson 3: Explaining the Authorized-Actual (AAC) Report

Lesson Objectives

After completing this lesson, you will be able to:

- Explain and define the AAC report selection parameters
- Run the AAC report
- Read and explain the AAC report results

Lesson 4: Explaining Stocks Requirements and Fulfillment

Lesson Objectives

After completing this lesson, you will be able to:

- Request Stock Material based on results from Authorized / Actual Comparison

Lesson 5: Explaining the Condition Code/Return Delivery

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the concept of Condition Code
- Trigger an automatic return delivery

Lesson 6: Describing Loans

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the concept of loans
- Explain the differences between loans and returns

Lesson 7: Explaining Equipment Packages (EPA)

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the purpose of Equipment Packages
- Describe the structural prerequisites to support Equipment Packages
- Describe the master data requirements for Equipment Packages
- Describe the end-to-end process for Equipment Packages

Lesson 1: Explaining Logistical Integration in Org. structure

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Integration of Logistics for Provisions and Organizational Structures

Lesson 2: Describing Master Data for Provisions

Lesson Objectives

After completing this lesson, you will be able to:

- Describe Material Master Data Aspects for Provisions

Lesson 3: Explaining Prioritization of Requirements

Lesson Objectives

After completing this lesson, you will be able to:

- Describe Options to prioritize Material Requirements

Lesson 4: Explaining Provisions Packages and Initial Supply Run

Lesson Objectives

After completing this lesson, you will be able to:

- Plan authorized provisions of a Force Element using a Provision Package FMPO
- Describe the execution of the initial supply for a force element

Lesson 5: Explaining Manual Requests, Advice, and Status Code

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how to manually request materials using SAP Fiori apps

Lesson 6: Explaining MRP Live Requests

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how MRP Live can be used by Defense Organizations to plan material provisions

Lesson 7: Explaining Automated Supply of High Priority Requirements

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how requirement priorities can be used to automate the creation of Stock Transport Purchase Orders and Outbound Deliveries

Lesson 8: Explaining Return Delivery

Lesson Objectives

After completing this lesson, you will be able to:

- Initiate and Process a Material Return

Lesson 1: Describing Personal and Functional Equipment - Overview and Concepts

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how SAP Defense and Security uses Personal and Functional Equipment to manage materials issued to persons

Lesson 2: Describing Planning of Personal and Functional Equipment

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the definition of authorized materials for persons

Lesson 3: Describing the Issuing of Personal and Functional Equipment

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the process to issue functional and personal equipment

Lesson 4: Describing Reporting and Service Activities

Lesson Objectives

After completing this lesson, you will be able to:

- Monitor the equipment status of persons and force elements

Lesson 5: Describing the Returning of Personal and Functional Equipment

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the process to return functional and personal equipment

- Describe the process of transferring personal and functional equipment from one person to another

Lesson 6: Describing Customizing and Master Data

Lesson Objectives

After completing this lesson, you will be able to:

- Describe necessary customizing settings to issue materials to persons
- Describe master data required to issue materials to persons

Lesson 1: Describing Technical Objects in Defense Maintenance

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the differences of technical objects including master equipment and critical/site equipment
- Describe the configuration control

Lesson 2: Explaining Work Center Integration

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Work Center Integration in SAP Defense and Security
- Describe the difference between a Responsible Work Center and an Executing Work Center

Lesson 3: Describing Model Maintenance Dependencies in a Defense Organization

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the maintenance attributes of a Force Element

Lesson 4: Outlining the Standard Corrective Maintenance Process

Lesson Objectives

After completing this lesson, you will be able to:

- Outline a corrective maintenance process in SAP D&S

Lesson 5: Describing the Forwarding Process of Maintenance Notifications

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the forwarding process in SAP D&S

Lesson 6: Describing the Usage of Extended View for Maintenance Notification

Lesson Objectives

After completing this lesson, you will be able to:

- Understand which information is provided by the extended view for maintenance notifications

Lesson 7: Explaining Maintenance Book

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the Maintenance Book

Lesson 8: Utilizing Status Management

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Technical Status
- Explain the Aggregation of the Technical Status
- Describe the Operational Status
- Describe the Status Board App

Lesson 9: Monitoring a Relocation of Technical Objects

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the relocation process of technical objects

Lesson 10: Identifying and Modeling Platforms to Describe Business Capabilities

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the definition and concept of Platform Code
- Explain some key business needs for using the Platform Code functionalities
- Explain the differences to other existing Defense and Security object hierarchies

Lesson 11: Using the D&S Application Variants for Standard Maintenance Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Explain what native Fiori apps are currently available for SAP Defense and Security

Lesson 1: Outlining the Support of Flight Operations Prerequisites

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the prerequisites to use the functionalities of support of flight operations

Lesson 2: Describing Support of Flight Operations Scenarios

Lesson Objectives

After completing this lesson, you will be able to:

- Explain a typical line maintenance scenario

Lesson 3: Managing Status in Flight Operation

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the different kind of statuses of Defense and Security line maintenance

Lesson 4: Creating and Monitoring Flights

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how Defense and Security supports Flight Operations Management

Lesson 5: Explaining Aircraft Assignment

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how Defense and Security provides decision support for selecting aircraft to be assigned to a flight

Lesson 6: Describing after Flight Debriefing and Malfunction Documentation

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the debriefing procedure after flight

Lesson 7: Describing Customizing

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the general steps of customizing for support of flight operations

Lesson 1: Explaining Logistical Integration into Organizational Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how provisions are integrated into organizational structure

Lesson 2: Describing Provisions Master Data

Lesson Objectives

After completing this lesson, you will be able to:

- Describe provision package objects (PPAs)
- Describe relevant material master attributes
- Describe material master data creation in bulk
- Describe mass change of material master data on MRP area level

Lesson 3: Describing Prioritization of Requirements

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how priorities are used in the DFPS solution
- Describe how requirement priorities and delivery priorities and derived

Lesson 4: Describing Initial Supply Run

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how provision packages (PPAs) are used to carry out initial supply of a force element

Lesson 5: Describing Manual Requests

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how to manually request materials through standard SAP transactions and through DFPS

Lesson 6: Describing Live Requests

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how MRP can be used by defense organizations to plan material provisions

Lesson 7: Describing Automated Supply of High-Priority Requirements

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how requirement priorities can be used to automate the creation of purchase orders and deliveries

Lesson 8: Describing Return Deliveries

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how return deliveries are used for provision materials
- Describe return material manually
