vii Course Overview

1 Unit 1: Introduction to Web Dynpro

- 1 Lesson: Outlining the Benefits of Web Dynpro
- 1 Lesson: Displaying Web Dynpro Component Architecture
- 1 Lesson: Navigating Between Views
- 1 Lesson: Creating View Assemblies
- 1 Lesson: Identifying Web Dynpro Entities and Relationships

3 Unit 2: Web Dynpro Controllers

- 3 Lesson: Outlining Controller Types and Entities

5 Unit 3: Web Dynpro Context

- 5 Lesson: Creating Context Nodes
- 5 Lesson: Setting Context Node Properties
- 5 Lesson: Sharing Data Between Controllers with Context Mapping

7 Unit 4: Web Dynpro User Interface

- 7 Lesson: Defining the View Layout
- 7 Lesson: Controlling UI Element Behavior with Data Binding
- 7 Lesson: Using Composite UI Elements
- 7 Lesson: Creating Static Context Menus

9 Unit 5: Controller and Context Programming

- 9 Lesson: Outlining Controller Methods and Attributes
- 9 Lesson: Accessing the Context at Runtime with Controller Methods
- 9 Lesson: Adding New Elements to a Context Node
- 9 Lesson: Implementing Supply Functions

11 Unit 6: Internationalization and Messages

- 11 Lesson: Using ABAP Dictionary Texts and the Online Text Repository (OTR)
- 11 Lesson: Implementing an Assistance Class
- 11 Lesson: Reporting Messages

13 Unit 7: Value Help, Semantic Help, and Keyboard Access

- 13 Lesson: Providing Value Help
- 13 Lesson: Providing Value Selectors
- 13 Lesson: Providing Semantic Help
- 13 Lesson: Providing Keyboard Access

15	Unit 8:	Component Reuse
15		Lesson: Reusing Web Dynpro Components
15		Lesson: Declaring a Component Usage
15		Lesson: Implementing Advanced Aspects of Component Reuse
17	Unit 9:	Dialog Boxes
17		Lesson: Creating Dialog Boxes
19	Unit 10:	Adaptation Techniques
19		Lesson: Adapting Web Dynpro Applications
19		Lesson: Configuring Web Dynpro Applications
19		Lesson: Identifying the Available Enhancements for Web Dynpro
19		Lesson: Modifying the Context at Runtime
19		Lesson: Modifying the UI at Runtime
21	Unit 11:	SAP List Viewer for Web Dynpro ABAP
21		Lesson: Using SAP List Viewer (ALV) in Web Dynpro for ABAP
23	Unit 12:	Web Dynpro Select Options
23		Lesson: Using Web Dynpro Select Options
25	Unit 13:	Web Dynpro Application Troubleshooting
25		Lesson: Monitoring Web Dynpro Applications
25		Lesson: Debugging Web Dynpro Applications
25		Lesson: Analyzing Applications at Runtime

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Developer

Lesson 1: Outlining the Benefits of Web Dynpro

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the programming approach of Web Dynpro
- Identify the benefits of the metadata approach of Web Dynpro

Lesson 2: Displaying Web Dynpro Component Architecture

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the main elements of Web Dynpro
- Explain the context and data transport

Lesson 3: Navigating Between Views

Lesson Objectives

After completing this lesson, you will be able to:

- Set up navigation between views

Lesson 4: Creating View Assemblies

Lesson Objectives

After completing this lesson, you will be able to:

- Create view assemblies

Lesson 5: Identifying Web Dynpro Entities and Relationships

Lesson Objectives

After completing this lesson, you will be able to:

- Differentiate between internally and externally visible Web Dynpro entities

Lesson 1: Outlining Controller Types and Entities

Lesson Objectives

After completing this lesson, you will be able to:

- Differentiate the controller types
- Outline the structure of component and custom controllers
- Outline the structure of view and window controllers

Lesson 1: Creating Context Nodes

Lesson Objectives

After completing this lesson, you will be able to:

- Create a context node with attributes

Lesson 2: Setting Context Node Properties

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the cardinality property
- Set the singleton property of a context node

Lesson 3: Sharing Data Between Controllers with Context Mapping

Lesson Objectives

After completing this lesson, you will be able to:

- Define internal context mapping

Lesson 1: Defining the View Layout

Lesson Objectives

After completing this lesson, you will be able to:

- Differentiate UI elements
- Define the layout using container elements
- Add UI elements to the layout

Lesson 2: Controlling UI Element Behavior with Data Binding

Lesson Objectives

After completing this lesson, you will be able to:

- Bind UI element properties to context attributes
- Control UI element behavior

Lesson 3: Using Composite UI Elements

Lesson Objectives

After completing this lesson, you will be able to:

- Outline UI composite element hierarchy
- Bind a table UI element and its child elements to the context
- Set the selection property for table UIs

Lesson 4: Creating Static Context Menus

Lesson Objectives

After completing this lesson, you will be able to:

- Create static context menus

Lesson 1: Outlining Controller Methods and Attributes

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how hook methods are processed
- Use controller method
- Use controller attributes

Lesson 2: Accessing the Context at Runtime with Controller Methods

Lesson Objectives

After completing this lesson, you will be able to:

- Access the context of a controller
- Access the context node elements

Lesson 3: Adding New Elements to a Context Node

Lesson Objectives

After completing this lesson, you will be able to:

- Add new elements to a context node

Lesson 4: Implementing Supply Functions

Lesson Objectives

After completing this lesson, you will be able to:

- Use supply functions

Lesson 1: Using ABAP Dictionary Texts and the Online Text Repository (OTR)

Lesson Objectives

After completing this lesson, you will be able to:

- Use data element texts in Web Dynpro
- Use OTR alias texts in Web Dynpro

Lesson 2: Implementing an Assistance Class

Lesson Objectives

After completing this lesson, you will be able to:

- Define translatable texts in an assistance class

Lesson 3: Reporting Messages

Lesson Objectives

After completing this lesson, you will be able to:

- Define a message area
- Report messages
- Report messages of the TEXT category
- Report messages of the T100 category
- Report messages of the EXCEPTION category

Lesson 1: Providing Value Help

Lesson Objectives

After completing this lesson, you will be able to:

- Use dictionary value help
- Use a value suggestion

Lesson 2: Providing Value Selectors

Lesson Objectives

After completing this lesson, you will be able to:

- Implement value selectors

Lesson 3: Providing Semantic Help

Lesson Objectives

After completing this lesson, you will be able to:

- Define tooltips for UI elements
- Define input prompts for input fields
- Define explanation property of UI elements
- Display field-dependent help text
- Define UI-element-independent explanation texts
- Use the Help Center

Lesson 4: Providing Keyboard Access

Lesson Objectives

After completing this lesson, you will be able to:

- Provide access to UI elements using keyboard commands

Lesson 1: Reusing Web Dynpro Components

Lesson Objectives

After completing this lesson, you will be able to:

- Define a component interface

Lesson 2: Declaring a Component Usage

Lesson Objectives

After completing this lesson, you will be able to:

- Declare the usage of a component in another component
- Use a component usage at runtime
- Embed an interface view of a component usage
- Call methods defined in the interface controller of a component usage

Lesson 3: Implementing Advanced Aspects of Component Reuse

Lesson Objectives

After completing this lesson, you will be able to:

- Subscribe to the events defined in the interface controller of a component usage
- Define context nodes in a component interface controller

Lesson 1: Creating Dialog Boxes

Lesson Objectives

After completing this lesson, you will be able to:

- Differentiate between dialog boxes in Web Dynpro
- Create an external dialog box
- Create a confirmation dialog box
- Create and open a dialog box displaying a window of the same component
- Create and open a dialog box displaying an interface view of a component usage

Lesson 1: Adapting Web Dynpro Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Adapt Web Dynpro applications

Lesson 2: Configuring Web Dynpro Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Configure Web Dynpro applications

Lesson 3: Identifying the Available Enhancements for Web Dynpro

Lesson Objectives

After completing this lesson, you will be able to:

- Identify the available enhancements for Web Dynpro

Lesson 4: Modifying the Context at Runtime

Lesson Objectives

After completing this lesson, you will be able to:

- Create context nodes and context attributes dynamically

Lesson 5: Modifying the UI at Runtime

Lesson Objectives

After completing this lesson, you will be able to:

- Modify existing UI elements at runtime
- Create new UI elements in the UI element hierarchy at runtime

Lesson 1: Using SAP List Viewer (ALV) in Web Dynpro for ABAP

Lesson Objectives

After completing this lesson, you will be able to:

- Display mass data with the SAP List Viewer (ALV) for Web Dynpro ABAP

Lesson 1: Using Web Dynpro Select Options

Lesson Objectives

After completing this lesson, you will be able to:

- Integrate the Select Options component into your Web Dynpro component
- Display selection criteria for searching in data sets
- Access the user's input programmatically and use it to read the model data

Lesson 1: Monitoring Web Dynpro Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Monitor Web Dynpro applications

Lesson 2: Debugging Web Dynpro Applications

Lesson Objectives

After completing this lesson, you will be able to:

- Debug Web Dynpro applications

Lesson 3: Analyzing Applications at Runtime

Lesson Objectives

After completing this lesson, you will be able to:

- Analyze applications at runtime
