Contents

vii **Course Overview**

1	Unit 1:	Introduction to Floorplan Manager (FPM) for Web Dynpro ABAP
1		Lesson: Identifying Web Dynpro ABAP Fundamentals
1		Lesson: Reusing Modules in a Web Dynpro Application
1		Lesson: Incorporating Adaptation
1		Lesson: Defining a Component Configuration
1		Lesson: Describing Implicit and Explicit Configuration
1		Lesson: Implementing Interface IF_FPM_UI_BUILDING_BLOCK
3	Unit 2:	FPM Application Development
3		Lesson: Creating an Application and Component Configuration
3		Lesson: Configuring FPM Components Using the Configuration
		Editor
3		Lesson: Configuring an Overview Page (OVP) Application
3		Lesson: Embedding User Interface Building Blocks (UIBBs)
3		Lesson: Personalizing an Application Using the Personalization Editor
4		Lesson: Configuring Additional Screens in an FPM Application
4		Lesson: Configuring the Toolbar and Explanation Texts
4		Lesson: Implementing Basic Programming in FPM
4		Lesson: Triggering FPM Events from the Application
4		Lesson: Employing Display, Edit, and Processing Modes
4		Lesson: Accessing the FPM Toolbar at Runtime
4		Lesson: Accessing the Identification Region (IDR) at Runtime
5		Lesson: Employing the FPM Message Manager
7	Unit 3:	Incorporation of Generic UI Building Blocks (GUIBBs)
7		Lesson: Building Applications Using GUIBBs
7		Lesson: Defining a Component Configuration and Identifying
		Runtime Aspects for a FORM GUIBB
7		Lesson: Defining a Component Configuration and Identifying
		Runtime Aspects for a LIST ATS GUIBB
7		Lesson: Configuring the TREE GUIBB
7		Lesson: Configuring the Tabbed Component UIBB
8		Lesson: Configuring the Search GUIBB
8		Lesson: Configuring the Composite GUIBB
8		Lesson: Configuring the Launchpad GUIBB
8		Lesson: Configuring the Personal Object Worklist (POWL) GUIBB
8		Lesson: Configuring the Form Repeater GUIBB

9	Unit 4:	Advanced Topics in FPM Application Development
9		Lesson: Defining the Application Controller
9		Lesson: Defining the Application Configuration Controller(AppCC)
9		Lesson: Assigning an AppCC to an FPM Application
9		Lesson: Sharing Data Between UIBBs
9		Lesson: Employing Dialog Boxes
10		Lesson: Employing Drag and Drop in an FPM Application
10		Lesson: Describing the Effect of the Drop Target on the Drop Event
10		Lesson: Employing a Wire Model
11	Unit 5:	Additional Processes in FPM Application Development
11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench
11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation
11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT)
11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT) Lesson: Utilizing Context-Based Adaptation (CBA)
11 11 11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT) Lesson: Utilizing Context-Based Adaptation (CBA) Lesson: Completing Advanced CBA Configuration
11 11 11 11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT) Lesson: Utilizing Context-Based Adaptation (CBA) Lesson: Completing Advanced CBA Configuration Lesson: Performing Runtime Analysis with the Runtime Analysis
11 11 11 11 11 11	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT) Lesson: Utilizing Context-Based Adaptation (CBA) Lesson: Completing Advanced CBA Configuration Lesson: Performing Runtime Analysis with the Runtime Analysis Tool
11 11 11 11 11 11 11 12	Unit 5:	Additional Processes in FPM Application Development Lesson: Running the FPM Workbench Lesson: Creating an Application with the FPM Application Creation Tool (ACT) Lesson: Utilizing Context-Based Adaptation (CBA) Lesson: Completing Advanced CBA Configuration Lesson: Performing Runtime Analysis with the Runtime Analysis Tool Lesson: Using Integrated Data Access (IDA) in a LIST ATS

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Developer
- Development Consultant

vii

UNIT 1 Introduction to Floorplan Manager (FPM) for Web Dynpro ABAP

Lesson 1: Identifying Web Dynpro ABAP Fundamentals

Lesson Objectives

After completing this lesson, you will be able to:

- · Identify the architectural elements of Web Dynpro applications
- Identify Web Dynpro controllers

Lesson 2: Reusing Modules in a Web Dynpro Application

Lesson Objectives

After completing this lesson, you will be able to:

• Reuse a Web Dynpro component

Lesson 3: Incorporating Adaptation

Lesson Objectives

After completing this lesson, you will be able to:

• Describe adaptation

Lesson 4: Defining a Component Configuration

Lesson Objectives

After completing this lesson, you will be able to:

• Define a component configuration

Lesson 5: Describing Implicit and Explicit Configuration

Lesson Objectives

After completing this lesson, you will be able to:

Describe customization

Lesson 6: Implementing Interface IF_FPM_UI_BUILDING_BLOCK

Lesson Objectives

After completing this lesson, you will be able to:

• Create components for an FPM application and implement interface IF_FPM_UI_BUILDING_BLOCK

UNIT 2 FPM Application Development

Lesson 1: Creating an Application and Component Configuration

Lesson Objectives

After completing this lesson, you will be able to:

- Define User-Interface Building Blocks (UIBBs)
- Create a simple FPM application

Lesson 2: Configuring FPM Components Using the Configuration Editor

Lesson Objectives

After completing this lesson, you will be able to:

• Use the configuration editor to configure various components

Lesson 3: Configuring an Overview Page (OVP) Application

Lesson Objectives

After completing this lesson, you will be able to:

• Describe the configuration of an OVP application

Lesson 4: Embedding User Interface Building Blocks (UIBBs)

Lesson Objectives

After completing this lesson, you will be able to:

Embed UIBBs

Lesson 5: Personalizing an Application Using the Personalization Editor

Lesson Objectives

After completing this lesson, you will be able to:

• Personalize an application using the personalization editor

Lesson 6: Configuring Additional Screens in an FPM Application

Lesson Objectives

After completing this lesson, you will be able to:

Configure additional screens

Lesson 7: Configuring the Toolbar and Explanation Texts

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the OIF and GAF toolbars
- Configure the OVP toolbar
- Configure explanation (help) texts

Lesson 8: Implementing Basic Programming in FPM

Lesson Objectives

After completing this lesson, you will be able to:

• Use FPM events

Lesson 9: Triggering FPM Events from the Application

Lesson Objectives

After completing this lesson, you will be able to:

• Trigger FPM events

Lesson 10: Employing Display, Edit, and Processing Modes

Lesson Objectives

After completing this lesson, you will be able to:

• Employ different FPM modes

Lesson 11: Accessing the FPM Toolbar at Runtime

Lesson Objectives

After completing this lesson, you will be able to:

- Access the FPM toolbar in OIF and GAF
- Access the FPM toolbar in OVP

Lesson 12: Accessing the Identification Region (IDR) at Runtime

Lesson Objectives

After completing this lesson, you will be able to:

• Access the IDR at runtime

Lesson 13: Employing the FPM Message Manager

Lesson Objectives

After completing this lesson, you will be able to:

• Employ the FPM message manager

UNIT 3 Incorporation of Generic UI Building Blocks (GUIBBs)

Lesson 1: Building Applications Using GUIBBs

Lesson Objectives

After completing this lesson, you will be able to:

• Recognize GUIBB fundamentals

Lesson 2: Defining a Component Configuration and Identifying Runtime Aspects for a FORM GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

- Identify various form layouts
- Define a component configuration for a GUIBB (Design Time)
- Identify runtime aspects in relation to the FORM GUIBB

Lesson 3: Defining a Component Configuration and Identifying Runtime Aspects for a LIST ATS GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

- Define component configuration for a LIST ATS GUIBB (Design Time)
- Identify runtime aspects in relation to the LIST ATS GUIBB
- Use the personalization options to personalize the UI

Lesson 4: Configuring the TREE GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

- Define component configuration for a TREE GUIBB (Design Time)
- Identify runtime aspects in relation to the TREE GUIBB

Lesson 5: Configuring the Tabbed Component UIBB

Lesson Objectives

After completing this lesson, you will be able to:

• Define component configuration for a Tabbed Component GUIBB

Lesson 6: Configuring the Search GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the search GUIBB
- Configure the search GUIBB
- Identify runtime aspects in relation to the search GUIBB

Lesson 7: Configuring the Composite GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

• Configure the composite GUIBB

Lesson 8: Configuring the Launchpad GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

• Configure the launchpad GUIBB

Lesson 9: Configuring the Personal Object Worklist (POWL) GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

• Configure the POWL GUIBB

Lesson 10: Configuring the Form Repeater GUIBB

Lesson Objectives

After completing this lesson, you will be able to:

• Configure the Form Repeater GUIBB

UNIT 4 Advanced Topics in FPM Application Development

Lesson 1: Defining the Application Controller

Lesson Objectives

After completing this lesson, you will be able to:

Use the application controller

Lesson 2: Defining the Application Configuration Controller(AppCC)

Lesson Objectives

After completing this lesson, you will be able to:

• Define the application configuration controller

Lesson 3: Assigning an AppCC to an FPM Application

Lesson Objectives

After completing this lesson, you will be able to:

Assign an AppCC to an FPM application

Lesson 4: Sharing Data Between UIBBs

Lesson Objectives

After completing this lesson, you will be able to:

Share data between UIBBs.

Lesson 5: Employing Dialog Boxes

Lesson Objectives

After completing this lesson, you will be able to:

- Configure an FPM dialog box
- Open an FPM Dialog Box
- Close an FPM Dialog Box

© Copyright. All rights reserved.

Lesson 6: Employing Drag and Drop in an FPM Application

Lesson Objectives

After completing this lesson, you will be able to:

• Configure drag and drop

Lesson 7: Describing the Effect of the Drop Target on the Drop Event

Lesson Objectives

After completing this lesson, you will be able to:

• Describe the effect of the drop target on the drop event

Lesson 8: Employing a Wire Model

Lesson Objectives

After completing this lesson, you will be able to:

• Employ a wire model

UNIT 5 Additional Processes in FPM Application Development

Lesson 1: Running the FPM Workbench

Lesson Objectives

After completing this lesson, you will be able to:

• Prepare and run the FPM Workbench

Lesson 2: Creating an Application with the FPM Application Creation Tool (ACT)

Lesson Objectives

After completing this lesson, you will be able to:

- Create an application using the ACT
- Create an FPM application based on Service Adaptation Definition Language (SADL) entities

Lesson 3: Utilizing Context-Based Adaptation (CBA)

Lesson Objectives

After completing this lesson, you will be able to:

- Identify correct usage of context-based adaptation
- Identify context-based adaptation fundamentals
- Enable an application for CBA

Lesson 4: Completing Advanced CBA Configuration

Lesson Objectives

After completing this lesson, you will be able to:

• Complete detailed CBA configuration

Lesson 5: Performing Runtime Analysis with the Runtime Analysis Tool

Lesson Objectives

After completing this lesson, you will be able to:

• Use the runtime analysis tool

Lesson 6: Using Integrated Data Access (IDA) in a LIST ATS Component

Lesson Objectives

After completing this lesson, you will be able to:

• Use IDA in a LIST ATS Component
