vii Course Overview

1 Unit 1: Quality Management Processes in the Logistics Processes

1	Lesson: Understanding the Positioning of Quality Management
1	Lesson: Understanding the Inspection Process Flow in Quality Management - Overview
1	Lesson: Understanding the Problem Processing with Quality Notifications - Overview

3 Unit 2: Basic Data in Quality Management

3	Lesson: Using Material Master and Inspection Settings
3	Lesson: Using Sample Determination
3	Lesson: Using Dynamic Modification
3	Lesson: Processing Inspection Setup - Mass Maintenance
3	Lesson: Using Master Inspection Characteristic
4	Lesson: Using Input Processing for Measured Values
4	Lesson: Using Code Groups and Codes
4	Lesson: Using Selected Sets and Catalog Profile
4	Lesson: Using Inspection Method
4	Lesson: Distributing QM Basic Data
4	Lesson: Using the Material Specification

7 Unit 3: Inspection Planning

7	Lesson: Using the Inspection Plan
7	Lesson: Using Test Equipment
7	Lesson: Using Inspection Characteristics in the Inspection Plan
7	Lesson: Using Reference Operation Set and Product Structure
7	Lesson: Using the Engineering Workbench
8	Lesson: Using Engineering Change Management
8	Lesson: Using Task List - Material Specification
8	Lesson: Using Flexible Inspection Specifications
8	Lesson: Using Multiple Specifications - Overview (Optional)

9 Unit 4: Results Recording

9	Lesson: Recording and Valuating Inspection Results
---	--

11 Unit 5: Defects Recording

11	Lesson: Using Defects Recording in Inspection Processing
----	--

13 Unit 6: Usage Decision

13	Lesson: Processing Inspection Completion with the Usage Decision
----	--

15	Unit 7:	Definition and Structure of Notifications
15		Lesson: Explaining Definition and Structure of Notifications
17	Unit 8:	Quality Notifications in Logistics
17		Lesson: Using Quality Notifications at Goods Receipt
17		Lesson: Processing Customer Complaints
19	Unit 9:	Quality Notifications in Production
19		Lesson: Using Quality Notification During Production
21	Unit 10:	General Functions of Quality Notifications
21		Lesson: Using General Functions and Customizing Settings for Quality Notifications
23	Unit 11:	Quality-Related Costs and QM Orders
23		Lesson: Using QM Order
25	Unit 12:	SAP Business Workflow in QM - Overview
25		Lesson: Using SAP Business Workflow in Quality Management - Overview

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- End User
- Super / Key / Power User
- Business User

UNIT 1

Quality Management Processes in the Logistics Processes

Lesson 1: Understanding the Positioning of Quality Management

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the integration of Quality Management (QM) in the logistical processes and explain the most important areas of Quality Management

Lesson 2: Understanding the Inspection Process Flow in Quality Management - Overview

Lesson Objectives

After completing this lesson, you will be able to:

- Get an overview of the inspection process flow

Lesson 3: Understanding the Problem Processing with Quality Notifications - Overview

Lesson Objectives

After completing this lesson, you will be able to:

- Describe problem processing with quality notifications

Lesson 1: Using Material Master and Inspection Settings

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the inspection settings in the material master
- Explain Customizing for the inspection settings

Lesson 2: Using Sample Determination

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the master data for sample determination
- Describe the tasks of the sampling procedure

Lesson 3: Using Dynamic Modification

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the structure of the modification rule
- Explain how to use dynamic modification

Lesson 4: Processing Inspection Setup - Mass Maintenance

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the mass maintenance options for the inspection setup
- Use mass maintenance for an inspection setup that is already active

Lesson 5: Using Master Inspection Characteristic

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the structure of master inspection characteristics
- Explain the options for using master inspection characteristics

Lesson 6: Using Input Processing for Measured Values

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the functions of input processing for measured values
- Describe how these functions can be used

Lesson 7: Using Code Groups and Codes

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the structure of coding
- Describe how the different catalog types can be used

Lesson 8: Using Selected Sets and Catalog Profile

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the structure of a selected set
- Explain how selected sets can be used in inspection planning

Lesson 9: Using Inspection Method

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the possible uses of inspection methods
- Explain inspection planning using inspection methods

Lesson 10: Distributing QM Basic Data

Lesson Objectives

After completing this lesson, you will be able to:

- Distribute certain QM basic data to other systems
- Describe the different distribution processes

Lesson 11: Using the Material Specification

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the structure of the material specification
- Describe the possible uses of the material specification

Lesson 1: Using the Inspection Plan

Lesson Objectives

After completing this lesson, you will be able to:

- Use the inspection plan
- Describe the assignment of QM basic data in the inspection plan

Lesson 2: Using Test Equipment

Lesson Objectives

After completing this lesson, you will be able to:

- Use test equipment
- Explain the prerequisites for regularly monitoring the test equipment used

Lesson 3: Using Inspection Characteristics in the Inspection Plan

Lesson Objectives

After completing this lesson, you will be able to:

- Use and create additional inspection characteristics in inspection plans

Lesson 4: Using Reference Operation Set and Product Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the options for the product structure within inspection planning

Lesson 5: Using the Engineering Workbench

Lesson Objectives

After completing this lesson, you will be able to:

- Use the Engineering Workbench for inspection planning

Lesson 6: Using Engineering Change Management

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the structure of the change master record

Lesson 7: Using Task List - Material Specification

Lesson Objectives

After completing this lesson, you will be able to:

- Use Task List - Material Specification

Lesson 8: Using Flexible Inspection Specifications

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the requirements for flexible inspection specifications

Lesson 9: Using Multiple Specifications - Overview (Optional)

Lesson Objectives

After completing this lesson, you will be able to:

- Use multiple specifications in inspection planning, in the inspection process, and at certificate creation

Lesson 1: Recording and Valuating Inspection Results

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the different valuation options for inspection results
- Describe the processes in results recording

Lesson 1: Using Defects Recording in Inspection Processing

Lesson Objectives

After completing this lesson, you will be able to:

- Record defects at inspection lot, operation, or characteristic level
- Activate a quality notification from the created defect record

Lesson 1: Processing Inspection Completion with the Usage Decision

Lesson Objectives

After completing this lesson, you will be able to:

- Process inspection completion with the usage decision
- Plan UD codes

Lesson 1: Explaining Definition and Structure of Notifications

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the elements that are constituent parts of a quality notification system
- Describe the structure of a quality notification and how it can be used
- Describe how you can configure a quality notification

Lesson 1: Using Quality Notifications at Goods Receipt

Lesson Objectives

After completing this lesson, you will be able to:

- Use quality notifications at goods receipt
- Complain when a faulty delivery is received

Lesson 2: Processing Customer Complaints

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the procedure for returns and repairs processing using quality notifications

Lesson 1: Using Quality Notification During Production

Lesson Objectives

After completing this lesson, you will be able to:

- Create quality notifications in the system for general internal problems
- Create and process quality notifications with order confirmation

Lesson 1: Using General Functions and Customizing Settings for Quality Notifications

Lesson Objectives

After completing this lesson, you will be able to:

- Define new notification types and set up the required screen areas
- Explain the functions and structure of the action box for the notification type

Lesson 1: Using QM Order

Lesson Objectives

After completing this lesson, you will be able to:

- Describe how the QM order is used and represented in the SAP system
- Create and Assign a QM order
- Describe how a confirmation is executed for the QM order
- Settle a QM order
- Display a cost report for a QM order

Lesson 1: Using SAP Business Workflow in Quality Management - Overview

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the main elements of the SAP Business Workflow
- Describe the use of the SAP Business Workflow in processes in quality management
- Describe the basic Customizing activities for the workflow
