vii Course Overview

1 Unit 1: Master Data for Production

1 Lesson: Using Organizational Elements and Master Data in Production

3 Unit 2: Material

3 Lesson: Introducing Material
3 Lesson: Creating a Material
3 Lesson: Assign Documents
3 Lesson: Classifying Material
3 Lesson: Managing the Material
4 Lesson: Working with the Product Master

5 Unit 3: Bill of Material (BOM)

5 Lesson: Introducing Bills of Material (BOMs)
5 Lesson: Managing BOMs
5 Lesson: Changing BOMs with Engineering Change Management
5 Lesson: Performing mass changes and working with browsers
5 Lesson: Analyzing BOMs

7 Unit 4: Work Centers

7 Lesson: Creating Work Centers
7 Lesson: Creating Capacities in a Work Center

9 Unit 5: Task Lists

9 Lesson: Task Lists
9 Lesson: Creating Material Assignments and Component Allocations
9 Lesson: Creating Suboperations and User-Defined Fields
9 Lesson: Creating Production Versions
9 Lesson: Creating Production Resources and Tools (PRTs)
10 Lesson: Analyzing and Changing Task Lists
10 Lesson: Engineering Workbench

11 Unit 6: Advanced Bill of Material Functions

11 Lesson: Describing Phantom Assemblies
11 Lesson: Creating Co-Products and By-Products
11 Lesson: Creating Alternative Components
11 Lesson: Creating Multiple BOMs
11 Lesson: Creating Variant BOMs

13 Unit 7: Advanced Routing Functions

13	Lesson: Modeling Sequences
13	Lesson: Modeling Alternative Manufacturing Processes
13	Lesson: Creating Reference Operation Sets
13	Lesson: Applying Lead-Time Scheduling to Update a Material
13	Lesson: Scheduling Time Elements and Reduction in the Routing
13	Lesson: Work with Scrap

15 Unit 8: Appendix

15	Lesson: PLM Web User Interface
15	Lesson: Customizing
15	Lesson: Material
15	Lesson: Routing
15	Lesson: Accessing and Creating Types of Data
16	Lesson: Organizational Elements

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Super / Key / Power User
- Business Analyst
- Business Process Owner/Team Lead/Power User
- User

Lesson 1: Using Organizational Elements and Master Data in Production

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the use of organizational elements and master data objects in production planning

Lesson 1: Introducing Material

Lesson Objectives

After completing this lesson, you will be able to:

- Describe a material
- Give a first overview on the material

Lesson 2: Creating a Material

Lesson Objectives

After completing this lesson, you will be able to:

- Maintain prerequisites for creating material
- Create materials using different methods

Lesson 3: Assign Documents

Lesson Objectives

After completing this lesson, you will be able to:

- Assigning Documents

Lesson 4: Classifying Material

Lesson Objectives

After completing this lesson, you will be able to:

- Classify a material with different scenarios

Lesson 5: Managing the Material

Lesson Objectives

After completing this lesson, you will be able to:

- Manage Materials
- Define a material status

- Perform a mass change

Lesson 6: Working with the Product Master

Lesson Objectives

After completing this lesson, you will be able to:

- Work with Product Master
- Benefit from the UI of the Product Master

Lesson 1: Introducing Bills of Material (BOMs)

Lesson Objectives

After completing this lesson, you will be able to:

- Give an overview on material BOMs
- Define the prerequisites
- Work with the BOM structure

Lesson 2: Managing BOMs

Lesson Objectives

After completing this lesson, you will be able to:

- Create and change material BOMs
- Work with group and plant specific BOMs

Lesson 3: Changing BOMs with Engineering Change Management

Lesson Objectives

After completing this lesson, you will be able to:

- Give an overview of Engineering Change Management
- Work with a change master
- Change material BOMs with a change master

Lesson 4: Performing mass changes and working with browsers

Lesson Objectives

After completing this lesson, you will be able to:

- Perform mass changes
- Work with the product structure and material BOM browser

Lesson 5: Analyzing BOMs

Lesson Objectives

After completing this lesson, you will be able to:

- Perform a BOM explosion
- Check in which BOMs materials are used
- Execute a BOM comparison

Lesson 1: Creating Work Centers

Lesson Objectives

After completing this lesson, you will be able to:

- Create work centers

Lesson 2: Creating Capacities in a Work Center

Lesson Objectives

After completing this lesson, you will be able to:

- Create capacities for a work center

Lesson 1: Task Lists

Lesson Objectives

After completing this lesson, you will be able to:

- Explain task lists
- Create the first routings

Lesson 2: Creating Material Assignments and Component Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Create material assignments
- Perform a component allocation

Lesson 3: Creating Suboperations and User-Defined Fields

Lesson Objectives

After completing this lesson, you will be able to:

- Create suboperations and user-defined fields

Lesson 4: Creating Production Versions

Lesson Objectives

After completing this lesson, you will be able to:

- Create product versions

Lesson 5: Creating Production Resources and Tools (PRTs)

Lesson Objectives

After completing this lesson, you will be able to:

- Create production resources and tools

Lesson 6: Analyzing and Changing Task Lists

Lesson Objectives

After completing this lesson, you will be able to:

- Analyze and change task lists

Lesson 7: Engineering Workbench

Lesson Objectives

After completing this lesson, you will be able to:

- Work with the Engineering Workbench

Lesson 1: Describing Phantom Assemblies

Lesson Objectives

After completing this lesson, you will be able to:

- Describe phantom assemblies

Lesson 2: Creating Co-Products and By-Products

Lesson Objectives

After completing this lesson, you will be able to:

- Create co-products and by-products

Lesson 3: Creating Alternative Components

Lesson Objectives

After completing this lesson, you will be able to:

- Create alternative components

Lesson 4: Creating Multiple BOMs

Lesson Objectives

After completing this lesson, you will be able to:

- Create multiple BOMs

Lesson 5: Creating Variant BOMs

Lesson Objectives

After completing this lesson, you will be able to:

- Create variant BOMs

Lesson 1: Modeling Sequences

Lesson Objectives

After completing this lesson, you will be able to:

- Work with parallel and alternative sequences

Lesson 2: Modeling Alternative Manufacturing Processes

Lesson Objectives

After completing this lesson, you will be able to:

- Create alternative routings and production versions

Lesson 3: Creating Reference Operation Sets

Lesson Objectives

After completing this lesson, you will be able to:

- Create reference operation sets

Lesson 4: Applying Lead-Time Scheduling to Update a Material

Lesson Objectives

After completing this lesson, you will be able to:

- Apply lead-time scheduling to update the material

Lesson 5: Scheduling Time Elements and Reduction in the Routing

Lesson Objectives

After completing this lesson, you will be able to:

- Work with time elements
- Perform a time reduction inside routing

Lesson 6: Work with Scrap

Lesson Objectives

After completing this lesson, you will be able to:

- Use scrap inside material, material BOMs and routings

Lesson 1: PLM Web User Interface

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the PLM web User Interface

Lesson 2: Customizing

Lesson Objectives

After completing this lesson, you will be able to:

- Customize master data
- Create a plant in SAP ERP
- Create a storage location
- Work with MRP areas

Lesson 3: Material

Lesson Objectives

After completing this lesson, you will be able to:

- Describe material: additional infos

Lesson 4: Routing

Lesson Objectives

After completing this lesson, you will be able to:

- Create trigger points

Lesson 5: Accessing and Creating Types of Data

Lesson Objectives

After completing this lesson, you will be able to:

- Navigate to configuration data

- Access master data
- Create transactional data

Lesson 6: Organizational Elements

Lesson Objectives

After completing this lesson, you will be able to:

- Organizational Elements
