vii Course Overview

1 Unit 1: Introducing Transportation Management

- 1 Lesson: Explaining the Transportation Management Features and Functions
- 1 Lesson: Accessing Transportation Management Using SAP Fiori Apps

3 Unit 2: Defining Transportation Management Master Data

- 3 Lesson: Explaining General Master Data for Transportation Management
- 3 Lesson: Explaining Organizational Structures for Transportation Management
- 3 Lesson: Using Materials Master Data for Transportation Management
- 3 Lesson: Using Business Partner for Transportation Management

5 Unit 3: Developing Transportation Networks

- 5 Lesson: Understanding Transportation Networks
- 5 Lesson: Creating Locations
- 5 Lesson: Creating Transportation Zones
- 5 Lesson: Creating Transportation Lanes
- 5 Lesson: Creating Default Routes and Schedules

7 Unit 4: Managing Transportation Capacities, Conditions and Incompatibilities

- 7 Lesson: Defining Transportation Capacities
- 7 Lesson: Using Conditions and Incompatibilities
- 7 Lesson: Scenario Builder

9 Unit 5: Creating Transportation Requirements

- 9 Lesson: Defining Transportation Relevance
- 9 Lesson: Defining Freight Units
- 9 Lesson: Managing Packaging Information

11 Unit 6: Planning Transportation

11	Lesson: Defining Transportation Documents
11	Lesson: Defining Planning Processes
11	Lesson: Planning Interactively
11	Lesson: Planning Automatically Using the Optimizer and Proposal
12	Lesson: Planning Loads
12	Lesson: Creating Freight Bookings
12	Lesson: Selecting Carriers and Tendering
12	Lesson: Creating Service Orders

13 Unit 7: Monitoring Transportation Execution

13	Lesson: Creating Deliveries
13	Lesson: Integrating into Warehouse Processes
13	Lesson: Loading and Unloading Freight Orders
13	Lesson: Generating Document Outputs for Print and Digital Delivery
13	Lesson: Monitoring the Execution of the Freight Documents

15 Unit 8: Processing Transportation Cost and Charges

15	Lesson: Managing Charge Calculation Master Data
15	Lesson: Calculating Charges in Freight Documents
15	Lesson: Settling Freight Charges
15	Lesson: Distributing Freight Costs

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

Lesson 1: Explaining the Transportation Management Features and Functions

Lesson Objectives

After completing this lesson, you will be able to:

- Explain standard processes in transportation management

Lesson 2: Accessing Transportation Management Using SAP Fiori Apps

Lesson Objectives

After completing this lesson, you will be able to:

- Set up workspace preferences and create queries and views to analyze transportation needs and transportation orders

Lesson 1: Explaining General Master Data for Transportation Management

Lesson Objectives

After completing this lesson, you will be able to:

- Conceptualize general master data

Lesson 2: Explaining Organizational Structures for Transportation Management

Lesson Objectives

After completing this lesson, you will be able to:

- Conceptualize the organizational structures relevant for transportation management

Lesson 3: Using Materials Master Data for Transportation Management

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the role of material master data in the context of transportation management

Lesson 4: Using Business Partner for Transportation Management

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the role of business partners in the context of transportation management

Lesson 1: Understanding Transportation Networks

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the use of transportation networks in SAP TM

Lesson 2: Creating Locations

Lesson Objectives

After completing this lesson, you will be able to:

- Create locations

Lesson 3: Creating Transportation Zones

Lesson Objectives

After completing this lesson, you will be able to:

- Create transportation zones

Lesson 4: Creating Transportation Lanes

Lesson Objectives

After completing this lesson, you will be able to:

- Create transportation lanes

Lesson 5: Creating Default Routes and Schedules

Lesson Objectives

After completing this lesson, you will be able to:

- Create default routes and schedules

Lesson 1: Defining Transportation Capacities

Lesson Objectives

After completing this lesson, you will be able to:

- Create transportation capacities

Lesson 2: Using Conditions and Incompatibilities

Lesson Objectives

After completing this lesson, you will be able to:

- Use conditions and incompatibilities to model business requirements

Lesson 3: Scenario Builder

Lesson Objectives

After completing this lesson, you will be able to:

- Use the Scenario Builder

Lesson 1: Defining Transportation Relevance

Lesson Objectives

After completing this lesson, you will be able to:

- Explain transportation relevance and how sales and purchasing trigger transportation processes

Lesson 2: Defining Freight Units

Lesson Objectives

After completing this lesson, you will be able to:

- Analyze freight units, their attributes and their use

Lesson 3: Managing Packaging Information

Lesson Objectives

After completing this lesson, you will be able to:

- Recognize the role of package building and normalized quantities

Lesson 1: Defining Transportation Documents

Lesson Objectives

After completing this lesson, you will be able to:

- Recognize the purpose of various documents related to the planning and execution of transportation processes

Lesson 2: Defining Planning Processes

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the different planning processes and options
- Explain the different selection options for planning processes
- Define the tasks involved in transportation planning and identify the relevant SAP Fiori apps used to carry out these tasks

Lesson 3: Planning Interactively

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the relevant transportation activities and their scheduling logic
- Access the transportation cockpit
- Perform interactive planning to create freight orders

Lesson 4: Planning Automatically Using the Optimizer and Proposal

Lesson Objectives

After completing this lesson, you will be able to:

- Generate a transportation proposal
- Understand the logic of VSR optimization
- Execute the VSR optimizer

Lesson 5: Planning Loads

Lesson Objectives

After completing this lesson, you will be able to:

- Generate a load plan

Lesson 6: Creating Freight Bookings

Lesson Objectives

After completing this lesson, you will be able to:

- Create freight bookings and recognize how they differ from freight orders

Lesson 7: Selecting Carriers and Tendering

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the carrier selection process
- Assign carriers to freight orders and freight bookings
- Tender freight orders
- Explain freight collaboration through SAP Business Network for Logistics

Lesson 8: Creating Service Orders

Lesson Objectives

After completing this lesson, you will be able to:

- Create service orders relevant to the transportation of goods and materials

Lesson 1: Creating Deliveries

Lesson Objectives

After completing this lesson, you will be able to:

- Create deliveries and integrate them into the transportation process
- Explain the options for delivery integration

Lesson 2: Integrating into Warehouse Processes

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how the transportation process integrates with warehouse processes
- Understand the options to integrate into warehousing processes
- Understand the advanced shipping and receiving process

Lesson 3: Loading and Unloading Freight Orders

Lesson Objectives

After completing this lesson, you will be able to:

- Load and unload freight orders and post goods issue

Lesson 4: Generating Document Outputs for Print and Digital Delivery

Lesson Objectives

After completing this lesson, you will be able to:

- Generate outputs for your freight order and preview the documents

Lesson 5: Monitoring the Execution of the Freight Documents

Lesson Objectives

After completing this lesson, you will be able to:

- Monitor the execution of freight documents

Lesson 1: Managing Charge Calculation Master Data

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how freight agreements, charge calculation sheets, rate tables, and scales are maintained

Lesson 2: Calculating Charges in Freight Documents

Lesson Objectives

After completing this lesson, you will be able to:

- Calculate transportation charges

Lesson 3: Settling Freight Charges

Lesson Objectives

After completing this lesson, you will be able to:

- Generate freight settlement documents
- Post freight charges to MM
- Verify freight invoices

Lesson 4: Distributing Freight Costs

Lesson Objectives

After completing this lesson, you will be able to:

- Distribute freight costs to relevant sales order items and other transportation relevant process items
- Include freight costs into the SD billing document
