vii Course Overview

1 Unit 1: Discovering SAP Business Data Cloud

1 Lesson: Introducing SAP Business Data Cloud

3 Unit 2: Introducing SAP Analytics Cloud Planning

3 Lesson: Exploring the SAP Analytics Cloud Planning Process

3 Lesson: Planning Using SAP Analytics Cloud

5 Unit 3: Planning in Stories

5 Lesson: Creating and Managing Versions

5 Lesson: Viewing Version Data from the Planning Model

5 Lesson: Adding New Dimension Members from Data Tables

5 Lesson: Performing Manual Planning

5 Lesson: Using Mass and Fluid Data Entry When Planning in Data Tables

6 Lesson: Planning Using Inverse Dimension Formulas

6 Lesson: Planning on Multiple Hierarchies and Distributing Data with Planning Panels

6 Lesson: Using Seamless Planning with SAP Datasphere

7 Unit 4: Configuring Data Actions

7 Lesson: Exploring Data Actions

7 Lesson: Using Data Actions to Copy Data Within a Model

7 Lesson: Using Data Actions to Copy Data Between Models

7 Lesson: Using the Visual Editor to Create an Advanced Formula Data Action

7 Lesson: Using the Script Editor to Create an Advanced Formula Data Action

7 Lesson: Creating Dynamic Data Actions and Tables

8 Lesson: Creating and Running Multi Actions

8 Lesson: Managing Data Action Performance

9 Unit 5: Allocating Planning Data

9 Lesson: Outlining the Concept of Allocations

9 Lesson: Creating Data Action Allocations

9 Lesson: Performing Allocations

11 Unit 6: Translating Currencies for Planning

11 Lesson: Configuring Currency Translation

11 Lesson: Performing Currency Translation

13	Unit 7:	Forecasting and Simulating Planning Data
13		Lesson: Configuring Rolling Forecast Layouts
13		Lesson: Forecasting with Predictive Analytics
13		Lesson: Simulating with Value Driver Trees
13		Lesson: Simulating Data with SAP Analytics Compass
15	Unit 8:	Coordinating and Controlling Processes
15		Lesson: Auditing Planning Data
15		Lesson: Validating Planning Data Input
15		Lesson: Implementing Data Locking for a Model
15		Lesson: Using Calendar Processes

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Technology Consultant
- Industry / Business Analyst Consultant
- Business User
- Business Analyst

UNIT 1

Discovering SAP Business Data Cloud

Lesson 1: Introducing SAP Business Data Cloud

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the key functionality of SAP Business Data Cloud in relation to data analytics.

Lesson 1: Exploring the SAP Analytics Cloud Planning Process

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the process phases and planning-related topics of SAP Analytics Cloud.

Lesson 2: Planning Using SAP Analytics Cloud

Lesson Objectives

After completing this lesson, you will be able to:

- Access the different planning options available for SAP Analytics Cloud planning users.

Lesson 1: Creating and Managing Versions

Lesson Objectives

After completing this lesson, you will be able to:

- Create, maintain, and publish versions from stories.

Lesson 2: Viewing Version Data from the Planning Model

Lesson Objectives

After completing this lesson, you will be able to:

- Manage versions from planning models.

Lesson 3: Adding New Dimension Members from Data Tables

Lesson Objectives

After completing this lesson, you will be able to:

- Add new dimension members from data tables.

Lesson 4: Performing Manual Planning

Lesson Objectives

After completing this lesson, you will be able to:

- Perform simple data entry and work with planning data in tables.
- Disaggregate planning data, lock cells, and set cells in a table to read only.

Lesson 5: Using Mass and Fluid Data Entry When Planning in Data Tables

Lesson Objectives

After completing this lesson, you will be able to:

- Perform mass and fluid data entry in a data table.

Lesson 6: Planning Using Inverse Dimension Formulas

Lesson Objectives

After completing this lesson, you will be able to:

- Use inverse dimension formulas.

Lesson 7: Planning on Multiple Hierarchies and Distributing Data with Planning Panels

Lesson Objectives

After completing this lesson, you will be able to:

- Plan on multiple hierarchies.
- Distribute data with planning panels.

Lesson 8: Using Seamless Planning with SAP Datasphere

Lesson Objectives

After completing this lesson, you will be able to:

- Use seamless planning with SAP Datasphere.

Lesson 1: Exploring Data Actions

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the data action features.

Lesson 2: Using Data Actions to Copy Data Within a Model

Lesson Objectives

After completing this lesson, you will be able to:

- Create and run a data action to copy data within a model.

Lesson 3: Using Data Actions to Copy Data Between Models

Lesson Objectives

After completing this lesson, you will be able to:

- Create and run a data action to copy data from one model to another.

Lesson 4: Using the Visual Editor to Create an Advanced Formula Data Action

Lesson Objectives

After completing this lesson, you will be able to:

- Create an advanced formula data action using the visual editor.

Lesson 5: Using the Script Editor to Create an Advanced Formula Data Action

Lesson Objectives

After completing this lesson, you will be able to:

- Create an advanced formula data action using the script editor.

Lesson 6: Creating Dynamic Data Actions and Tables

Lesson Objectives

After completing this lesson, you will be able to:

- Build dynamic data actions and tables.

Lesson 7: Creating and Running Multi Actions

Lesson Objectives

After completing this lesson, you will be able to:

- Configure and run multi actions.

Lesson 8: Managing Data Action Performance

Lesson Objectives

After completing this lesson, you will be able to:

- Use best practice tips and performance tracking content.

Lesson 1: Outlining the Concept of Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the business purpose to use allocations.

Lesson 2: Creating Data Action Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Create data action allocations.

Lesson 3: Performing Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Perform an allocation.

Lesson 1: Configuring Currency Translation

Lesson Objectives

After completing this lesson, you will be able to:

- Configure currency translation in models and stories.

Lesson 2: Performing Currency Translation

Lesson Objectives

After completing this lesson, you will be able to:

- Perform currency translation in stories.

Lesson 1: Configuring Rolling Forecast Layouts

Lesson Objectives

After completing this lesson, you will be able to:

- Create rolling forecast layouts.

Lesson 2: Forecasting with Predictive Analytics

Lesson Objectives

After completing this lesson, you will be able to:

- Use predictive analytics for planning.

Lesson 3: Simulating with Value Driver Trees

Lesson Objectives

After completing this lesson, you will be able to:

- Simulate and forecast with value driver trees.

Lesson 4: Simulating Data with SAP Analytics Compass

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the difference between a compass simulation and a time series prediction and know when to use them.
- Simulate data in SAP Analytics Cloud using compass.
- Analyze simulation data and compare results.

Lesson 1: Auditing Planning Data

Lesson Objectives

After completing this lesson, you will be able to:

- Audit planning data.

Lesson 2: Validating Planning Data Input

Lesson Objectives

After completing this lesson, you will be able to:

- Validate planning data input.

Lesson 3: Implementing Data Locking for a Model

Lesson Objectives

After completing this lesson, you will be able to:

- Configure and use data locking to control data access in a model.
- Use data locking to control data access in a story.

Lesson 4: Using Calendar Processes

Lesson Objectives

After completing this lesson, you will be able to:

- Configure and run calendar processes.
