Contents

vii **Course Overview**

1 Unit 1: Loading and Initializing SAPUI5

- 1 Lesson: Getting Started with SAPUI5 Development
- 1 Lesson: Bootstrapping SAPUI5

3 Unit 2: Modularizing SAPUI5 Applications

- 3 Lesson: Defining and Using Modules

5 Unit 3: Working with Views and Controllers

- 5 Lesson: Working with XML Views
- 5 Lesson: Working with View Controllers

7 Unit 4: Structuring Applications via Components

- 7 Lesson: Configuring and Instantiating Components
- 7 Lesson: Using the Declarative API

9 Unit 5: Implementing the UI

- 9 Lesson: Structuring the UI with Controls
- 9 Lesson: Using Densities for Controls

11 Unit 6: Dealing with Fragments as Reusable UI Parts

- 11 Lesson: Implementing and Instantiating XML Fragments

13 Unit 7: Models and Data Binding

- 13 Lesson: Working with Models
- 13 Lesson: Implementing Aggregation Binding
- 13 Lesson: Implementing Element Binding
- 13 Lesson: Using Data Types
- 13 Lesson: Implementing and Using Formatter Functions
- 13 Lesson: Sorting and Filtering
- 14 Lesson: Using Expression Binding
- 14 Lesson: Adapting Applications to Different Device Types

15 Unit 8: Localization

- 15 Lesson: Working with a Resource Model

17 Unit 9: OData Model

- 17 Lesson: Reading Data through an OData Model
- 17 Lesson: Creating New Entities through an OData Model

19 **Unit 10: Routing and Navigation**

19	Lesson: Enabling the Routing
19	Lesson: Navigating to Routes with Hard-Coded Patterns
19	Lesson: Routing Back
19	Lesson: Catching Invalid Hashes
19	Lesson: Navigating to Routes with Mandatory Parameters

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Development Consultant
- Business Process Owner/Team Lead/Power User
- Developer
- Solution Architect

Lesson 1: Getting Started with SAPUI5 Development

Lesson Objectives

After completing this lesson, you will be able to:

- Set up SAP Business Application Studio

Lesson 2: Bootstrapping SAPUI5

Lesson Objectives

After completing this lesson, you will be able to:

- Load and initialize the SAPUI5 library to use SAPUI5 features

Lesson 1: Defining and Using Modules

Lesson Objectives

After completing this lesson, you will be able to:

- Modularize SAPUI5 applications

Lesson 1: Working with XML Views

Lesson Objectives

After completing this lesson, you will be able to:

- Create and use XML views

Lesson 2: Working with View Controllers

Lesson Objectives

After completing this lesson, you will be able to:

- Use view controllers

Lesson 1: Configuring and Instantiating Components

Lesson Objectives

After completing this lesson, you will be able to:

- Implement and use components

Lesson 2: Using the Declarative API

Lesson Objectives

After completing this lesson, you will be able to:

- Embed components declaratively in HTML pages

Lesson 1: Structuring the UI with Controls

Lesson Objectives

After completing this lesson, you will be able to:

- Create UIs using the Shell, App, Page, Panel and SimpleForm controls

Lesson 2: Using Densities for Controls

Lesson Objectives

After completing this lesson, you will be able to:

- Use content densities to adapt applications to different device types

Lesson 1: Implementing and Instantiating XML Fragments

Lesson Objectives

After completing this lesson, you will be able to:

- Work with dialogs defined as XML fragment

Lesson 1: Working with Models

Lesson Objectives

After completing this lesson, you will be able to:

- Add a JSON model to an application and use it via property binding

Lesson 2: Implementing Aggregation Binding

Lesson Objectives

After completing this lesson, you will be able to:

- Implement aggregation binding

Lesson 3: Implementing Element Binding

Lesson Objectives

After completing this lesson, you will be able to:

- Implement element binding

Lesson 4: Using Data Types

Lesson Objectives

After completing this lesson, you will be able to:

- Use data types to format and validate data

Lesson 5: Implementing and Using Formatter Functions

Lesson Objectives

After completing this lesson, you will be able to:

- Implement and use formatter functions to convert model data into an external format

Lesson 6: Sorting and Filtering

Lesson Objectives

After completing this lesson, you will be able to:

- Use the capabilities offered by SAPUI5 to sort and filter model data

Lesson 7: Using Expression Binding

Lesson Objectives

After completing this lesson, you will be able to:

- Use expression binding to format the output on a view

Lesson 8: Adapting Applications to Different Device Types

Lesson Objectives

After completing this lesson, you will be able to:

- Use a device model to adapt applications to different device types

Lesson 1: Working with a Resource Model

Lesson Objectives

After completing this lesson, you will be able to:

- Internationalize an application by using translatable texts

Lesson 1: Reading Data through an OData Model

Lesson Objectives

After completing this lesson, you will be able to:

- Read data from an OData service via an SAPUI5 OData model

Lesson 2: Creating New Entities through an OData Model

Lesson Objectives

After completing this lesson, you will be able to:

- Create new entities for an OData service via an SAPUI5 OData model

Lesson 1: Enabling the Routing

Lesson Objectives

After completing this lesson, you will be able to:

- Create an initial routing configuration in the application descriptor

Lesson 2: Navigating to Routes with Hard-Coded Patterns

Lesson Objectives

After completing this lesson, you will be able to:

- Navigate to a route that has a hard-coded pattern

Lesson 3: Routing Back

Lesson Objectives

After completing this lesson, you will be able to:

- Implement navigation back to an initial page

Lesson 4: Catching Invalid Hashes

Lesson Objectives

After completing this lesson, you will be able to:

- Display a notification view if a hash is entered for which there is no matching route

Lesson 5: Navigating to Routes with Mandatory Parameters

Lesson Objectives

After completing this lesson, you will be able to:

- Navigate to a route that has a mandatory parameter
