1. Simulate SAP S/4HANA and discover the intelligent enterprise

Did you ever wonder what your company would accomplish if you had real-time data and analytical capabilities to make the best decisions?

Let us give you a glimpse of what that may look like with SAP S/4HANA Simulation by Baton Simulations.

But be careful: you may find it difficult to go back to your current system after discovering the perks of the Intelligent Enterprise!

2. Deploy the right SAP solution on time and on budget

Did you try our SAP S/4HANA Simulation by Baton Simulations and want to deploy SAP S/4HANA in your company? Does your company need other SAP solutions implemented?

We at SAP Training & Enablement have a wide range of courses that might interest you. Why? Because the best implementation requires the users to be fully enabled on the software they will be using.

[Know more](#)

3. Fulfill your 2020 career development goals with SAP

A new decade means a new approach to success, which can only be achieved through personal development and knowledge.

We would like to help you to improve by offering the best SAP courses that can help you achieve your career development goals. Do you have a certification in mind that you want to complete in 2020? Follow our Learning Journeys to know exactly what courses you should complete to get ready to undertake the exam.

[Get started](#)

4. Certifications

It's much more than a piece of paper. It's peace of mind – Certification from SAP helps ensure that you get the IT value you need to succeed.

[List of available certifications](#)

5. New Courses

[S4F70: Business Processes in SAP Real Estate Management in SAP S/4HANA](#)

Book this course if you would like to become familiar with real estate processes in SAP, starting from the acquisition or creation of buildings and other real estate objects until the disposal of real estate objects. You will receive an overview on SAP solutions involved in mapping real estate processes and learn to use basic real estate relevant functions in SAP Real Estate Management in S/4HANA. You will practice the use of the main capabilities for real estate objects in SAP RE in the SAP S/4HANA system.

[S4105: Variant Configuration SAP S/4HANA Enterprise Management](#)

Book this course if you would like to get prepared for:

- [Model a configurable product](#)
- [Maintain all the related objects and master data](#)
- [Integrate variant configuration into processes in the supply chain](#)

This is an advanced course which requires the participant to be competent in SAP Classification functionality.

[S4510: Inventory Management and Physical Inventory in SAP S/4HANA](#)

This course offers a comprehensive overview and in-depth knowledge about inventory management and physical inventory in SAP S/4HANA. Book this course if you would like to understand the major business processes, functions and configuration in SAP S/4HANA Inventory Management and Physical Inventory.

[SACAD1: SAP Analytics Cloud: Analytics Designer](#)

Book this course if you would like to get all the knowledge you need to create analytic applications in SAP Analytics Cloud with lots of hands-on exercises:

- > Overview and Positioning
- > Creating Analytic Applications
- > Introduction and Usage of Scripting within an Analytic Application
- > Usage of complex scripting APIs
- > Working with Bookmarks and Comments
- > Inbound and Outbound Integration with external applications or information

[BIT101 + BIT102: SAP Integration Technology Interface I and II](#)

The course BIT101 SAP Integration Technology Interface I (BAPI / IDoc) provides you with a basic overview of the classic adapters RFC and IDoc of the SAP On-Premise Integration Solution. You will learn how to create and use both adapters and how to configure BAPI connectivity ((Business Application Programming).

Then deepen your knowledge with the training BIT102 SAP Integration Technology Interfaces II (Web Interfaces). This course gives you an overview of the technical implementation of Web services in SAP ABAP and their use in enterprise communication. The main part covers the various options for creating Web services for synchronous and asynchronous communication based on existing function modules (inside-out) or on the basis of externally created interfaces (ESR) (outside-in).

[CLD400: Developing with SAP Cloud Platform - ABAP Environment](#)

Book this course if you would like to learn how with SAP Cloud Platform ABAP Environment, customers and partners can develop and run custom ABAP code on a separate Platform-as-a-Service, decoupled from the digital core. You will see how to leverage existing ABAP know-how with a state-of-the-art development toolset in conjunction with existing SAP Cloud Platform assets and services. With this knowledge the ABAP community can profit from increased development productivity and a faster time-to-market of custom ABAP applications and extensions.

GRC360: SAP Tax Compliance

In this course, you will learn the background of the solution SAP Tax Compliance, its functionality and purpose. This course will prepare you to define technical checks, maintain them in the customizing of the solution and enable, parameterize and schedule them to run in the Fiori frontend. Furthermore, you will get an understanding about the process of the mitigation of findings, how it is set up, maintained and executed.
