

SAP® Hands-On Learning
SAP Knowledge and Education

SAP® Hands-On Learning

SCOPE

- System-based exercises
- Simulation of real-life challenges

DURATION

One to four days, depending on the learning scenario

DELIVERY METHOD

- SAP® Live Class
- Instructor-led training (ILT)

PREREQUISITES

Theoretical background is beneficial to follow an SAP Hands-On Learning course most effectively.

CONTENT STRUCTURE

- Theory – 10%
- Practical exercise – 90%

INSTRUCTOR ROLE

- Instructor has a supportive role, rather than delivering top-down knowledge transfer.
- Instructor opens the lecture to present the topic, explains the work environment, and supervises and intervenes if needed and wanted during the hands-on period.

CURRENT OFFERING

<https://training.sap.com/content/hands-on-learning>

LEARNING SCENARIOS

- Practice session
 - Repeat exercises from mainly certification-relevant courses and eventual deep dive
- Case studies
 - Advanced exercises
 - From-start-to-finish scenario (for example, migration and implementation)
- Field testing
 - Advanced problem set is provided in broken systems.
 - Participants are encouraged to solve system challenges with the help of an instructor.
