SAP Learning Journey *beta*
A simple way to guide your learning

What is a Learning Journey?
A Learning journey is a visual guide to help you think about the path to become fully competent with a new SAP innovation. This visualization should make it easier to see every offering that is available for a topic and understand how things are connected.

The journey is not a “mandatory” track or sequence of courses. It offers you a high-level view of your choices. Based on your goals and your prior knowledge, you can select what would work for you.

How can I use it?
Each learning journey is presented using the metaphor of a subway map. Each “station” tile represents a course, learning room, or any other kind of learning offering:

- Basic information such as the name, type, and duration is easily accessible. (In some cases a code is shown - as in this SAP Education course: S4H01 or S4H01E)
- Simple buttons will take you directly to the learning offering / course. (In some cases you may need to register first or pay additional fees depending on your situation.)

Why “beta”?
We have just started exploring the value of this visualization, so if you have feedback or ideas about how to make the Learning Journey better, let us know! We appreciate a lot everyone’s contributions.

What kind of Learning Experiences does SAP offer?

- **Face-to-Face & Virtual Classroom Learning**
  - Offer the traditional instructor-led training experience.
  - Instructors and learners meet at a training site or, in the case of Virtual Live Classrooms (VLC), they connect over the web to participate in a comprehensive training and hands-on learning experience.

- **eLearning**
  - Provides interactive, Web-based materials that you can use at your own pace.
  - You control what to focus on and when; decide how many times you want to go over the materials, and when to stop.
  - eLearning can contain text, videos, demos, simulations, and other media and can be used for regular courses, Early Knowledge Transfer, or other purposes.

- **Learning Rooms**
  - Are online social environments where you can build and expand your SAP skills with informal social learning and curated learning content.
  - SAP Learning Rooms are delivered through the SAP Learning Hub and include all the content needed to achieve specific learning goals.

- **Academies / eAcademies**
  - Are "bundles" of learning offerings that cover the content of multiple classroom or eLearning courses together.
  - Often, these integrated offerings lead to a certification or are designed to facilitate the uniform training of project teams.

- **Certifications**
  - Are exams of different lengths and types, validating specific levels of competence with SAP solution knowledge and skills such as Associate, Specialist, or Professional.
  - Certification exams can be taken worldwide at physical and virtual locations.

- **openSAP courses**
  - Are free, open, online courses on SAP’s latest innovations.
  - Courses consist of videos, self-tests, discussion forums, weekly assignments, and a final exam.
  - After a course closes, all learning content remains available for consumption in self-paced mode.

- **SAP Live Access**
  - Lets you get hands-on experience with a live, fully supported, and private SAP system - preconfigured with the data you need to complete the exercises in SAP Learning Hub classes and free exploration.
  - Available to SAP Learning Hub subscribers in fixed-hour plans.

Where to access SAP Learning:

- The **SAP Learning Hub** provides access to eLearning courses, Learning Rooms, EKT Learning Maps, and Handbooks or “Flipbooks.” (*)Specific offerings might require different subscription levels or "editions."

- The **SAP Training Shop** allows you to book Classroom trainings as well as, in some cases, individual e-Learnings courses.

- **open.sap.com** provides access to openSAP courses (live and self-paced).
