SAMPLE QUESTIONS: C_HANATEC_12

SAP Certified Technology Associate - SAP HANA (Edition 2016)

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. Your customer is performing a full data backup every week and a delta backup daily. You need to implement the shortest recovery method for an SAP HANA database.

Which recovery order is the fastest?

a)	<input type="radio"/>	1. Full data backup 2. Log backup 3. Incremental backup
b)	<input type="radio"/>	1. Full data backup 2. Incremental backup 3. Log backup
c)	<input type="radio"/>	1. Full data backup 2. Differential backup 3. Log backup
d)	<input type="radio"/>	1. Full data backup 2. Log backup 3. Differential backup

2. You plan to migrate a non-SAP database to SAP HANA using the Database Migration Option of the Software Update Manager SP16.

Which URL should you use?

a)	<input type="radio"/>	http://<host>:<port>/lmsl/sumabap/<SID>/doc/sluigui
b)	<input type="radio"/>	http://<host>:<port>/lmsl/HDBLCM/<SID>/index.html
c)	<input type="radio"/>	http://<host>:<port>/lmsl/upgrade/<SID>/doc/gui
d)	<input type="radio"/>	http://<host>:<port>/lmsl/sumabap/<SID>/doc/gui

3. You are setting up a disaster recovery system using system replication. You want the transaction processing of the primary system to be suspended if the network to the secondary system fails.

What log replication mode must you use?

a)	<input type="radio"/>	async
b)	<input type="radio"/>	syncmem
c)	<input type="radio"/>	sync
d)	<input type="radio"/>	full sync

4. Which role do you need to have assigned to configure the kernel profiler?

a)	<input type="radio"/>	MONITORING
b)	<input type="radio"/>	SAP_INTERNAL_HANA_SUPPORT
c)	<input type="radio"/>	sap.hana.xs.lm.roles::Administrator
d)	<input type="radio"/>	sap.hana.admin.roles::Monitoring

5. What is the correct hierarchy of the SAP HANA component model?

a)	<input type="radio"/>	Product → Package → Delivery Unit → Object
b)	<input type="radio"/>	Package → Product → Delivery Unit → Object
c)	<input type="radio"/>	Delivery Unit → Product → Package → Object
d)	<input type="radio"/>	Product → Delivery Unit → Package → Object

6. You are planning a batch installation for a scale-out system.

Which settings do you need to make in the configuration file?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The instances on all hosts must use an identical instance number.
b)	<input type="radio"/>	The user ID of the <sid>adm user must be identical on all hosts.
c)	<input type="radio"/>	The max_mem parameter must be specified for the sum of all hosts
d)	<input type="radio"/>	The hostname specified must be identical on all hosts.

7. To which roles must you be assigned in the SAP HANA cockpit to plan SAP HANA backups?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	sap.hana.xs.admin.roles::JobSchedulerAdministrator
b)	<input type="radio"/>	sap.hana.ide.roles::SecurityAdmin
c)	<input type="radio"/>	sap.hana.backup.roles::Scheduler
d)	<input type="radio"/>	sap.hana.xs.admin.roles::JobAdministrator

8. On which tile can you monitor the operation mode of the SAP HANA cockpit?

a)	<input type="radio"/>	System Replication
b)	<input type="radio"/>	Database Status
c)	<input type="radio"/>	General Information
d)	<input type="radio"/>	Latest Alerts

9. What happens when you start the SAP HANA database?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	For the ROW tables, the secondary indexes are created during load.
b)	<input type="radio"/>	For the COLUMN tables, the primary indexes are created during load.
c)	<input type="radio"/>	The ROW store is completely loaded into the memory.
d)	<input type="radio"/>	The COLUMN store is completely loaded into the memory.

10. Which of the following tools can you use to create and manage SAP HANA database users?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	SAP Solution Manager
b)	<input type="radio"/>	SAP Identity Management
c)	<input type="radio"/>	SAP Web IDE
d)	<input type="radio"/>	Microsoft Active Directory
