SAMPLE QUESTIONS: C_AFARIA_02

SAP Certified Application Associate - SAP Afaria 7.0 Administration (SP04)

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. In your environment, several enterprise applications need to be delivered to various Android devices. While some of these devices will have cellular data access, you will also need to support some Wi-Fi-only tablets without SMS capability. Therefore you may need to utilize a setting on these tablets that is optional on other types of devices.

What is required for the Android-based Wi-Fi-only tablets?

Please choose the correct answer.

a)	☐	You must create a Wi-Fi configuration policy
b)	☐	You must build the enterprise application with data provisioning calls.
c)	☐	You must configure the device to use Google Cloud Messaging.
d)	☐	You must apply a configuration policy with software inventory enabled to the device.

2. Which files are backed up using the dbbackup utility included with SQL Anywhere?

Note: There are 2 correct answers to this question.

a)	☐	Exported events (.evf)
