SAMPLE QUESTIONS: C_SAPWMGR_62

SAP Certified Development Associate - SAP Work Manager for SAP 6.2 Development

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. You have changed the Agency application definitions and the Java layer in your project.

Which deployment actions do you have to execute in the Agency Editor?

Please choose the correct answer.

a)	☐	Save the Agency application in the Agency editor and export the JAR file to the deploy directory of the target server.
b)	☐	Save the Java project in the Editor and publish the Agency application to the target server.
c)	☐	Publish the Agency application and create and export the JAR file to the deploy directory of the target server.
d)	☐	Save the project in the Agency Editor and deploy the application JAR file by copying it to the deploy directory.

2. What is the technical drawback of having too many production versions of a mobile application in a production environment?

Please choose the correct answer.

a)	☐	The SAP Agency Production server's garbage collector will disregard the latest version of the mobile application.
b)	☐	The SAP Agency Production server's internal database will grow too big to hold all business data.
c)	☐	The SAP Agency Production server will load all application versions and can run out of memory.
d)	☐	The SAP Agency Production server only allows three production applications to be loaded at one point in time.

3. Your customer wants to add a new field to a complex table on a mobile client.

In which Java class, used by the complex table, does this field need to be added?

Please choose the correct answer.

a)	☐	BAPI class
b)	☐	Steplet class
c)	☐	Stephandler class
d)	☐	POJO class

4. What mobile application settings are critical to reduce the amount of data that is transferred to the mobile client during subsequent synchronizations?

Note: There are 2 correct answers to this question.

a)	☐	Exchange Object Configuration
b)	☐	Outbound Trigger Configuration
c)	☐	Enhancement Framework Implementation (EFI) Assignment
d)	☐	Push Scenario Definition

5. Which of the following must you use for cross-references between SAP object IDs and GIS system object IDs?

Note: There are 2 correct answers to this question.

a)	☐	A dynamic lookup routine
b)	☐	An object type assignment
c)	☐	An output special reference parameter
d)	☐	A mapping table

6. You want to test a BAPI wrapper in the SAP backend using the ABAP Function Modules transaction (SE37).

Which information do you provide in the IS_BAPI_INPUT import parameter?
Please choose the correct answer.

a)	☐	DO_ID
b)	☐	TIMESTAMP_FROM_MOBILE
c)	☐	MOBILE_USER
d)	☐	USER_GUID

7. What does the Agentry server use to determine which SAP BAPI wrapper to call when processing the transaction data received from a mobile device?

Please choose the correct answer.

a)	☐	The BAPI_WRAPPER Mobile Application parameter in the Configuration Panel
b)	☐	The CT_BAPI_WRAPPER Mobile Application parameter in the Configuration Panel
c)	☐	The BAPI_WRAPPER Mobile Application parameter in the Agentry.ini file
d)	☐	The assignment of the Mobile Data Object configuration to the BAPI wrapper in the Configuration Panel

8. In the SAP Work Manager configuration panel, for which of the following can you configure the scope of the mobile application parameter?

Note: There are 2 correct answers to this question.

a)	☐	User
b)	☐	Application
c)	☐	Mobile data object (MDO)
d)	☐	Exchange Object

9. After the installation of the SAP add-on for SAP Work Manager, the SAP Work Manager application does NOT appear in the configuration panel even though the configuration portal is active.

What could be the reason?

Please choose the correct answer.

a)	☐	The SAP service user is missing the required SAP ERP authorizations.
b)	☐	The service for the Admin portal is NOT activated.
c)	☐	The Business Configuration (BC) set is NOT activated.
d)	☐	Background jobs to maintain synchronization components have NOT been defined.
